We are not sure Mr. Clottes wants to keep a copyright on these, or whether he wants to put them in the Public Domain; in either case, we would prefer not to jeopardize his rights, and we thus are preparing this release as if it were copyrighted in 1995.

The translation in the original message we received was: "All rights reserved" so we are presuming the copyright. "Tous droits reserves" in the original French message... which is also included in this package and in English.

If you want to get permission to use these for more uses than a private one, we suggest you contact the Minstry of Culture.

Here is the permission statement we received in both French and English, and we are VERY glad to have received it on such short notice, and did not want to disturb things further by asking an additional time for more details. Monsieur,

Comme suite votre courrier ilectronique du 7 fivrier dernier, je vous informe que M. Jean Clottes, conseiller scientifique du sous-directeur de l'archiologie et auteur des quatre photographies et du texte sur la grotte ricemment dicouverte en Ardhche, a donni son autorisation pour l'utilisation de ses photographies dans le cadre du projet de CD-ROM Gutenberg.

Merci de ne pas oublier de mentionner son nom sur les documents publiis.

Sir,

As per your email of February 7th, I informed Mr. Jean Clottes, Scientific Consul to the Deputy-Director of Archeology and author of the four photographs and the texts concerning the cave paintings discovered in Ardhche, to get his authorization for the utilization of his photographs by the staff of Project Gutenberg's CDROM.

Please do not forget to mention his name in the documents you publish.

AN EXCEPTIONAL ARCHEOLOGICAL DISCOVERY

A Paleolithical Embellished Cave found in France (Ardeche)

An exceptional archeological discovery has been made public on January 17, 1995, by the Minister of Culture and French-Speaking language <Francophonie>, Mr. Jacques TOUBON.

Discovered during December 1994 at Vallon-Pont-d'Arc (Ardeche, France), the cave, composed of several spacious galleries and dens, is adorned with some 300 paleolithical paintings and engravings (dating 18,000 - 20,000 years before present time), which focus on a wide variety of animals including bears, owls, mammooths, rhinos and felines.

The cave has also retained several vestiges of human activities: fireplaces <hearths>, entailed flints and other clues which denote an evolution in tools and habits. Totally left intact and untouched by any human intrusion throughout the ages, the cave represents and exceptional source of studies for archeologists.

In the wake of the artistical and archeological interest spawned by this thrilling discovery of national and international importance, the Director of Cultural Heritage has signed on January 13th the proceedings to classify the site. <I don't know if the translation makes sense: a "classified site" is a site which, due to its cultural importance, becomes an official patrimony of the nation> This urgency measure, taking effect immediately, confers the cave for one year the same statute and privileges which the historical monuments benefit.

In order to ensure the preservation and the security of the cave, the Prefect of Ardeche has also signed on January 13 a by-law prohibiting the access to the cavity.

Decouverte d'une grotte ornee paleolithique a Vallon-Pont-d'Arc (Ardeche)

Cliches : Ministere de la culture et de la francophonie - Direction du Patrimoine Jean Clottes. Tous droits reserves.

Une decouverte archeologique d'une importance exceptionnelle vient d'intervenir dans les gorges de l'Ardeche, en limite du site naturel classe, en l'espece d'un vaste reseau souterrain orne d'un tres grand nombre de peintures et de gravures d'epoque paleolithique (vers 18000-20000 ans avant le present).

La decouverte est intervenue sur le territoire de la commune de Vallon-Pont-d'Arc, le 25 decembre dernier, dans le cadre d'une prospection archeologique autorisee au titre des dispositions de la loi validee du 27 septembre 1941 portant reglementation de la recherche archeologique de France. Elle est le fait de M. Jean-Marie Chauvet, agent de surveillance titulaire au sein du Service regional de l'archeologie (D.R.A.C Rhône-Alpes) assiste de deux benevoles Mme Eliette Brunel-Deschamps et M. Christian Hillaire.

Au terme d'une desobstruction manuelle conduite dans un boyau tres etroit marguant le fond d'une cavite mineure s'ouvrant dans les falaises du Cirque d'Estre, les inventeurs ont debouche par une cheminee dans un tres vaste reseau totalement vierge, richement concretionne et recelant de nombreux restes paleontologiques en place (os d'ours de cavernes- Ursus spelaeus- dans leur bauge d'hibernation). Les galeries, fortement dimensionnees (section de 5 x 4 metres en moyenne), joignent plusieurs vastes salles (jusqu'a 70 x 40 metres) et sont, de place en place, decorees de peintures et de gravures de figurations animalieres isolees ou organisees en panneaux comprenant plus de cinquante unites dont les dimensions varient de 0,50 m a 4 metres de long. Au total, environ 300 peintures a l'ocre rouge ou au noir ont ete actuellement observees et au moins autant de gravures. On remarque plusieurs cas de superposition, et, localement, des voiles concretionnes ou des griffades d'ours, l'ensemble de ces faits authentifiant (s'il en etait besoin) l'anciennete de ces decors.

a chaque extremite du reseau visite on peut constater la presence d'acces anciens actuellement colmates par des eboulis et des depots argileux.

L'ensemble des galeries parcourues cumule un lineaire de plusieurs centaines de metres au long duquel se developpe un bestiaire tres original et particulierement varie (chevaux, rhinoceros, lions, bisons, aurochs, ours, pantheres, mammouths, bouquetins, hiboux, etc...) accompagne de signes symboliques, de panneaux ponctues et de mains positives ou negatives.

Au plan artistique, il se degage un ensemble absolument unique dans le Sud de la France, que son importance et son originalite placent au meme rang que l'ensemble figure de Lascaux meme s'il n'offre pas de veritable polychromie ni le meme dimensionnement des representations.

Partout, les traits peints ou graves sont plus ou moins concretionnes. Les traits peints, vus dans leurs details, presentent l'aspect erode caracteristique des peintures anciennes, meme celles apparemment les mieux conservees. En outre, la grotte est vierge, avec des sols intacts et d'innombrables vestiges non touches. Dans une salle, un ensemble de gravures (cheval, mammouth, hibou) se trouve sur une retombee de voute a 5 ou 6 m du sol ; au-dessous, un vaste effondrement ancien explique ce qui s'est passe : une aspiration a provoque la formation de cet entonnoir et le sol sur lequel se trouvait l'artiste a alors disparu, de sorte que les gravures sont maintenant inaccessibles. Donc, l'authenticite est evidente.

La zone a peintures rouges comprend plusieurs panneaux de points, auxquels s'ajoutent parfois des signes, y compris des signes complexes originaux. Les panneaux avec des animaux rouges sont divers : dans une petite galerie, un cerf, est suivi tout au fond, de trois ours des cavernes et d'un cheval. Ailleurs, un grand panneau comprend plusieurs ours, dont un a l'avant-train tachete, un felin lui aussi tachete sur le haut du corps, un bouquetin et deux mammouths. Sur une paroi se voient un enorme rhinoceros a la corne disproportionnee, trois autres rhinoceros, un mammouth, deux felins, quatre mains positives et deux ou trois negatives, un demi-cercles de points rouges, un grand bovine, un signe fait de deux demi-cercles accoles. En tout, outre les points et les signes, plusieurs mains negatives completes et les mains positives, une trentaine de representations animales rouges et deux petites tetes de chevaux jaunes ont deja ete denombres. L'ours domine suivi du mammouth, du cheval, du rhinoceros, du felin ; le cerf, le bouquetin, l'aurochs, les indetermines, n'etant representes qu'a un seul exemplaire chacun.

Une centaine de figures noires a ete denombree : les rhinoceros dominent largement, suivis des felins puis des chevaux, les ours, des rennes, des bisons, des aurochs. On note la presence de mammouths, de cerfs megaceros, d'un bouquetin, de deux indetermines. Parmi les gravures, a noter 5 mammouths, 3 bouquetins, 2 rhinoceros, 2 chevaux, 1 aurochs, 1 hibou.

La facture de ces representations est excellente. Les proportions des corps sont naturalistes. Il s'agit surtout de dessins au trait, encore que certains presentent des a-plats de peinture a l'interieur des tetes ou des corps et un rendu savant du modele. De nombreux details anatomiques sont precises, de sorte que les animaux sont le plus souvent determinables sans ambiguite quant a l'espece et meme quant au sexe (femelles bisons, par exemple). Les dessins noirs ont "un air de famille" : la composition des panneaux, la facture des animaux, la technique employee partout avec une egale maitrise feraient penser a une meme "main". On peut legitimement se demander s'il ne s'agirait pas, en tres grande partie, de l'œuvre d'une seule personne, un grand maitre du trait. Les recherches futures le preciseront.

Par le nombre et la diversite des œuvres, par leur qualite esthetique et leur conservation, par leur originalite aussi (dominance d'especes rares ailleurs), par la preservation du contexte, cette grotte est unique et d'une importance mondiale. C'est l'un des plus grand chefs d'œuvres de l'art prehistorique.

Au plan paleontologique, la cavite recele egalement les restes d'une centaine d'ursides, soit en place dans leur loge d'hibernation, soit en position secondaire, que les os aient ete deplaces par le passage de l'Homme, ou que certains cranes aient ete redisposes par lui en des emplacements privilegies de la grotte (par exemple au centre d'une salle en rotonde, sur un bloc rocheux).

Cette abondance de restes dans un milieu preserve de toute perturbation moderne confere un second caractere d'importance a la decouverte.

Au plan archeologique, il convient de souligner le caractere unique d'un milieu clos exempt de toute intrusion et de tout remaniement. Outre les figurations, l'Homme a laisse dans la cavite de nombreux temoins de ses activites : foyers, silex tailles, traces de torches d'eclairage, amenagements de blocs rocheux, agencement de restes faunistiques et, surtout, de tres nombreuses empreintes de cheminement melees a celles des ours qui ont ete leurs contemporains dans les galeries. On remarque egalement des points d'extraction du sediment : confection de boulettes d'argile, recherche d'oxydes de fer et de manganese pour la confection des peintures.

a ce jour, il parait que la grotte est le seul reseau orne totalement intact qui nous soit parvenu depuis le Paleolithique.

Au plan de l'etude du milieu, la tres recente ouverture de la cavite permettra d'en etudier la climatologie interne. Il convient aussi de souligner la puissance des depots sedimentaires que la reprise d'erosion posterieure a l'occupation humaine a permis de mettre ponctuellement en evidence dans des puits de dissolution diriges vers le reseau perenne toujours actif a ce jour. La carbonatation des galeries est egalement intervenue apres le passage de l'Homme, scellant en de nombreux points des artefacts dans la calcite.

Il existe la une occasion unique d'etude naturaliste visant a retracer l'evolution des milieux naturels durant le dernier glaciaire et l'Holocene.

C'est la convergence de l'ensemble de ces caracteres, deja

exceptionnels pour chacun d'entre eux, qui confere une importance absolue au reseau nouvellement decouvert.

Section 2. Information about the Mission of Project Gutenberg™

Project Gutenberg[™] is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg[™]'s goals and ensuring that the Project Gutenberg[™] collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg[™] and future generations. To learn more about the Project Gutenberg Literary Archive Foundation scan help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg[™] depends upon and cannot survive without widespread public support and donations to carry out its mission of

increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate

Section 5. General Information About Project Gutenberg[™] electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg[™] concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg[™] eBooks with only a loose network of volunteer support.

Project Gutenberg[™] eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg™, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
