PREFACE.

I ASK every one who may become possessed of this book to read the recipes herein contained carefully and thoughtfully before attempting the making of any of them, and also to observe the following instructions:

Weigh and measure all ingredients exactly, and have everything ready to mix before you commence.

If you measure your ingredients by means of a cup be sure you use one which holds half a pint.

Use neither more nor less of anything than the recipe instructs you, and be sure to have your fire just right, as also instructed by the recipe.

If at first success does not come to you do not despair, but persist in following the advice of the old adage: "Try, try again."

You should always bear in mind that honest work is never lost and that reward must come in the end.

SYRUPS.

73. Plain or Sugar Syrup.— Dissolve 4 pounds white sugar, 1 quart cold water and the beaten white of 1 egg; stir until sugar is dissolved; simmer for 3 minutes; skim well, strain through a fine flannel bag and bottle in well corked bottles.

74. Pineapple Syrup.— Pare and cut some large, ripe pineapples into small pieces; put them in a stone jar or large bowl; sprinkle a little sugar between and let the pineapples stand covered with a cloth in cellar for 36 hours, or until they have bubbles on top; then strain through a sieve or coarse bag, and if not clear enough strain again through a flannel bag; add to each pint of juice 1 pound of sugar; stir until the sugar is melted; then put it over the fire and simmer 3 minutes; skim and put the syrup in bottles; cork well and keep them in cool place. This syrup may be thinned with 2 parts plain syrup.

75. Strawberry Syrup.— Choose none but fine, ripe berries if you wish your syrup to be good; mash the strawberries in a stone jar or bowl; cover with a thin white cloth and let them stand 24 hours at a temperature of 70° to 80° F.; then inclose in a flannel bag and press them; add to each pint of juice 1 pound sugar; stir until the sugar is dissolved; then put it over the fire, let it boil up, skim well, remove from fire and bottle while hot.

75a. Raspberry Syrup is made the same as strawberry.

18

76. Raspberry and Currant Syrup.— Take equal quantities of raspberries and currants; free the latter from stems; put the fruit together into a stone jar or bowl, mash it up, cover with a cloth and let stand for 24 hours; then inclose the fruit in a coarse bag, press out the juice and to each pint add 1 pound sugar; let it boil up and bottle.

77. Raspberry Syrup (without fruit).— To make 8 gallons of syrup prepare a plain syrup of 18 pounds sugar with 5 gallons of water and put it in a clean mixing barrel; next dissolve 2 ounces tataric acid in 1 pint cold water and add it to the syrup; then pour 1 quart boiling water over 4 ounces powdered orrisroot; let it get cold; then filter; add it also to the syrup and stir up well. Color it with the following mixture: Take ½ pound mallow or malva flowers and soak them in ½ gallon water for 6 hours; then mash in a mortar 2 ounces cochineal and 2 ounces alum and pour over these 2 quarts boiling water, and when cold filter; next mix both colors together, add them to the syrup and stir for 15-20 minutes. This is an excellent recipe for imitation of raspberry syrup.

78. Raspberry Syrup (without boiling).— Mash some ripe berries in a stone jar or bowl and set the paste for 3 days (covered with a linen cloth) in a cool cellar; then press out the juice through a coarse bag; let it stand for 6 hours; drain off the clear juice and leave the sediment; add to 1 pint juice 1 pound sugar, stir for 1 hour and bottle; cork bottles loosely and set them for 4 days in the sun; then filter through a fine flannel bag; re-bottle the syrup in small bottles, cork well and cover corks with beeswax. Syrup made in this way is excellent for sauces. Strawberry and Currant Syrup without boiling is made in the same manner.

79. Blackberry Syrup.— Mash the blackberries in a stone jar, cover and let them stand for 48 hours; then strain them through a bag; add to each pint of juice 1 pound sugar; stir until dissolved; put it over the fire to boil 3 minutes; skim well; add to each quart of syrup ½ gill of French brandy and bottle. Or take nice, ripe berries, mash and strain them; add to each pint of juice 1 pound sugar, ½ teaspoonful ground cloves and the same of cinnamon and mace; boil 5 minutes; add to 1 gallon of syrup ½ pint brandy and bottle.

19

minutes; skim well and bottle.

81. Apricot Syrup the same way. Or pare and cut the peaches into pieces, crack a few of the stones, add them to the fruit and let it stand 24 hours; then strain; allow for 1 pint juice 1 pound sugar; let it come to a boil; skim well and bottle.

20

88. Lemon Syrup.— Grate the rind of 16 large, fresh lemons over 8 pounds granulated sugar; add 2 quarts cold water and the juice of the lemons; stir until the sugar is melted; then strain through a fine flannel bag and put the syrup in well corked pint bottles. Be careful to grate off only the yellow part of the rind of the lemons; the white part will give the syrup a bitter taste. There is no better lemon syrup made than this. 2 to 3 tablespoonfuls of this syrup in a glass of cold water makes fine lemonade and is also excellent for mineral waters and sauces.

89. Lemon Syrup (with Oil of Lemon).— Add to 1 gallon plain syrup 25 drops oil of lemon and 10 drams citric acid; mix the oil and acid together gradually; then add the syrup slowly, and when well mixed bottle syrup and keep in a cool place for use.

21

EXTRACTS AND ESSENCES.

95. Essence of Vanilla.— Take 1 ounce vanilla beans; split each bean in two (lengthwise); then cut into small pieces; put these into a large bottle with 1 pint alcohol and 1 pint water; cork the bottle, not too tightly; set in a warm place for 3 weeks and shake it once every day; it will then be ready for use.

108. Meringue.— ½ pound powdered sugar and the whites of 5 eggs; carefully separate the whites from the yolks; put the whites in a deep kettle for 15 minutes on ice; then whip it with an egg beater to a stiff froth; mix in slowly the sugar and use at once. This meringue is used for ornamenting puddings and cakes.

109. Spinach Green (for coloring).— Wash a few handfuls spinach, press it out and pound in a mortar to a pulp; then press out the juice in a cloth; put the spinach liquid in a small saucepan; put it for a few minutes over the fire; as soon as the liquid curdles pour it on a fine sieve; let the water run off and the green which remains press through a fine sieve and put it in a well covered glass till wanted. If the form is oiled with fine almond oil the cream will turn out without dipping the form into hot water; the oiling is best done with a fine brush; the form is then turned upside down, so that all superfluous oil has a chance to run out.

24

116. Creme Française au Chocolat.— Melt ¼ pound grated chocolate in the oven; then put it with 1 quart cream, ¾ cup sugar and the yolks of 8 eggs over the fire; stir until nearly boiling; remove it from fire, add 1 teaspoonful essence of vanilla and 1 ounce clarified gelatine and finish same as in foregoing recipe.

JELLIES.

145. Jellies should be as clear as crystal, not too sweet and just firm enough to hold together. Jellies that have to stand any length of time on the buffets must, of course, be firmer. A good plan is to make a trial by putting a little in a tin cup and setting it on ice before the jelly is put into a form.

146. To Clarify Gelatine.— Put 2 ounces gelatine in a saucepan, add ½ pint cold water and let it stand 10 minutes; then add ½ pint boiling water, set the saucepan in a vessel of boiling water and stir until gelatine is dissolved; beat the whites of 2 eggs to a froth, add the juice of 1 large lemon and a little cold water; stir this into the gelatine, continue stirring until it boils, remove to side of stove and let it stand 5 minutes without boiling; then strain through a jelly bag and use as

directed in following recipes.

147. To Clarify Sugar.— Put 1 pound sugar in 1 pint cold water and stir till sugar is dissolved; then strain through a napkin. A quicker way is to boil the sugar and water with the juice of 1 lemon for a few minutes and strain the same way.

148. To Clarify Fruit Juice.— Lay a few sheets of filtering paper in water and let them soak for 15 minutes, changing the water twice; then press them out, pick into small pieces, wet a little again with water and put the paper into a small sieve; pour the fruit juice onto the paper and let it run through into a dish. If not clear the first time pour back again and let it run through once more.

149. Jelly Bag.— Take $\frac{3}{4}$ yard of white flannel and make a bias bag; this is done by taking the flannel on the bias, sewing the bottom and side together to a point; cut it even on top and hem; then sew a string on each end of hem. In using the bag lay a broom with one end on the back of a chair and the other end on a table; tie the bag onto the broom, in the center, so that it hangs between the table and chair; set a bowl underneath the bag; then pour in the jelly; pour that which runs through first back again into the bag; repeat this once or twice more until the jelly runs through clear. When all the jelly has run through fill it into a mould and set either on ice or in a cool place.

150. Orange Jelly.— Clarify 2 ounces of gelatine as directed (see Clarifying Gelatine), dissolve 1 pound sugar in 1 pint water, add the thin peel of 2 oranges and let it stand 1 hour; then remove orange peel and strain the sugar syrup through a napkin; remove the peel from 4 oranges, divide them into small quarters and remove the pits without breaking the fruit; next pour the juice of 8 oranges and 2 lemons through filtering paper (see Clarifying Fruit Juice); as soon as the gelatine, fruit juice and sugar are clarified mix the three together, place a jelly form into cracked ice, pour in a few spoonfuls jelly and when firm lay in one-third of the orange quarters, which should be wiped dry with a napkin; add sufficient jelly to cover the fruit and when hard lay over another third; cover again with jelly and continue until all is used up; cover the form, lay some ice on top and let it stand till firm; when ready to serve dip the form into hot water, wipe it dry, remove cover, turn the jelly into a dish and serve with vanilla sauce or sweet cream. NOTE.—If the inside of jelly mould is brushed with pure almond oil the form need not be dipped in hot water, as the jelly will slip out without any trouble. Fine olive oil may also be used, but care should be taken to use only the very best, as otherwise the flavor of the jelly will be spoiled.

151. Plain Orange Jelly.— Dissolve and clarify 1 ounce gelatine in $\frac{1}{2}$ pint water as directed, dissolve 1 cup sugar in $\frac{1}{2}$ pint water, add the thin peel of 1 orange and let it stand 1 hour; then strain through a napkin; let the juice of 5 oranges and 1 lemon run through filtering paper or a fine napkin; mix the gelatine, fruit juice and sugar syrup together, pour it into a jelly mould and set in a cool place to get firm; when ready to serve dip the form into hot water, turn the jelly onto a dish and serve with the following sauce:—Beat 1 egg to a froth, add by degrees 1 cup milk, 2 tablespoonfuls sugar and 1 teaspoonful vanilla extract.

152. Lemon Jelly.— Clarify 2 ounces gelatine as directed, dissolve $1\frac{1}{4}$ pounds sugar in 1 pint water, add the grated rind of 2 lemons and let it stand $\frac{1}{2}$ hour; then strain through a napkin; let 1 pint of lemon juice run through filtering paper (see Clarifying Fruit Juice); when the three ingredients have been clarified mix them together, fill the jelly into a jelly mould, set it on ice or in a cold place to get firm and serve same as Orange Jelly.

153. Strawberry Jelly.— Put 1 quart ripe strawberries in a colander, rinse them off with cold water and when drained mash them well in a bowl with a silver spoon; dissolve $\frac{3}{4}$ pound sugar in 1 pint cold water, add the juice of 1 lemon and put it over the fire to boil 5 minutes; strain through a napkin and when cold pour it over the strawberries; let them stand 3 hours; then strain the berries, first through a jelly bag and then through filtering paper; also let the juice of 2 oranges run through filtering paper; clarify 2 ounces gelatine as directed and when cold add it to the fruit juice; then make a trial by filling a few spoonfuls in a tin cup and set it on ice to form; if not firm enough add a little more dissolved gelatine; fill the jelly alternately with large strawberries in a jelly form and finish the same as Orange Jelly; serve with whipped cream.

154. Pineapple Jelly.— Pare and cut a large, ripe pineapple into quarters, remove the hard core from the center and cut the quarters of pineapple into fine slices; dissolve 1 pound sugar in 1 pint cold water and juice of 1 lemon, pour it over the pineapple pieces, cover and let it stand for 2 hours; chop the eyes and hard core of pineapple very fine, put them with 1 pint water in a saucepan over the fire and boil slowly $\frac{1}{2}$ hour; when cold strain them and add the liquid to the pineapple; in the meantime clarify 2 ounces gelatine as directed; then drain the pineapple in a sieve, wipe the slices dry with a napkin and lay them on a plate; let the pineapple syrup run through filtering paper or napkin and mix it with the clarified gelatine; also let the juice of 2 oranges and 1 lemon run through filtering paper and add it to the jelly; then make a trial to see if firm enough; place jelly form in cracked ice, pour a few spoonfuls of jelly into the form and when hard put in a layer of pineapple; cover them with jelly and when firm put in another layer of pineapple; continue until all is used up; then cover the form, put some ice on top of form and let it remain till jelly is firm; serve with or without cream or vanilla sauce. This jelly may also be made of preserved pineapple.

155. Jelly of Peaches.— Pare 8 large, ripe peaches, cut them into halves, remove the stones and cut each half into 3 or 4 pieces; put the fruit into a bowl and pour over it 1 pint of sugar syrup; let them stand well covered for 2 hours; scald the pits, remove the brown skin and put them with the peaches; then let the syrup run through filtering paper, mix it with 2 ounces clarified gelatine, fill the jelly with the peaches and pits in alternate layers in a form and finish the same as Orange

Jelly.

156. Raspberry Jelly.— Press the juice from 1 quart ripe raspberries, add the juice of 1 lemon and filter it through filtering paper (see Clarifying Fruit Juice); dissolve $\frac{3}{4}$ pound sugar in 1 pint water, strain through a napkin and add it to the raspberry juice; add 2 ounces clarified gelatine; set a jelly form into cracked ice and fill the jelly alternately with large, ripe raspberries into the form and finish the same as Orange Jelly.

157. Wine Jelly.— Soak 2 ounces gelatine in $\frac{1}{2}$ pint cold water for 10 minutes; then add $\frac{1}{2}$ pint boiling water and stir the whole over the fire till gelatine is dissolved; add the rind and juice of 1 lemon, 2 whole cloves, a small piece of cinnamon and the well beaten whites of 2 eggs; stir this with an egg beater till it boils; then remove the saucepan with its contents to side of stove and let it remain for 5 minutes without boiling; then strain it through a flannel jelly bag; dissolve $\frac{3}{4}$ pound sugar in 1 pint cold water, strain it through a napkin and add it with 1 pint Madeira to the gelatine; rinse out a jelly mould with cold water, pour in the jelly and set it on ice or in a cool place till firm. Instead of Madeira wine any other kind may be used.

34

158. Rhine Wine Jelly.— Dissolve and clarify 2 ounces gelatine and dissolve 1 pound sugar in 1 pint water; add the rind of 2 lemons and the juice of 1; let it stand 1 hour; then strain through a napkin; let the juice of 2 lemons run through filtering paper, add it with 1 pint Rhine wine and the sugar syrup to the clarified gelatine, fill the jelly in a form and set it on ice or in a cool place.

159. Champagne Jelly.— Dissolve and clarify 2 ounces gelatine (see Gelatine), dissolve $\frac{3}{4}$ pound sugar in 1 pint cold water, strain it through a napkin, add to the gelatine with $\frac{1}{2}$ bottle champagne and the filtered juice of 4 lemons, fill into a form and set it in a cool place or on ice.

160. This pain may be made of Bartlet pears in the same manner.

ICE CREAMS.

264. Directions for Making Ice Cream.— The implements needed are a freezer, rock salt and finely cracked ice. Ice cream freezers can be bought at any hardware store. They consist of a large wooden pail with a faucet on the side near the bottom and a freezer with a paddle inside. The cracking of the ice is best accomplished by putting it into a coarse sack and pounding it fine with a hammer or mallet. Place the freezer into the pail, put in the paddle and cover the freezer tightly. Fill the space between the pail and freezer with fine cracked ice to $\frac{1}{3}$ its height, sprinkle over 2 handfuls salt and pack down the ice with a piece of wood, so that it may be firm all around the freezer; continue with layers of ice, salt and the packing down till the ice reaches to the edge of cover; next pour into the freezer the mixture that is to be frozen; but care should be taken not to put in too much, for the cream needs plenty of room in order to become light and smooth; cover the freezer and let it stand for 5 minutes; then commence to turn; after 10 minutes' turning remove the cover from freezer and cut the frozen cream with a long bladed knife from the sides of can; repeat this every 10 minutes until the cream is frozen hard; then remove the paddle, even off the cream in the freezer, cover and let it stand for 10 minutes; do not draw off the water from pail until it stands above the ice and the freezer has lost its firm hold; after drawing off the water fill the space up again with cracked ice and salt; when the 10 minutes have elapsed fill the frozen cream into an ice form, cover tightly and paste a strip of buttered paper around the edge of cover; then pack the form into cracked ice and salt for 1 or 2 hours; when ready to serve take the form from the ice, rinse it off with cold water, remove the paper and wipe the form dry; then dip it quickly into hot water, take off the cover, turn the cream onto a dish and serve at once.

265. Ice Cream (large quantity).— 14 quarts sweet cream, 6 quarts milk, 7 pounds sugar, 30 eggs and $\frac{1}{4}$ pound gelatine; soak gelatine for 10 minutes in a little of the milk; put the remaining milk over the fire and boil; then add the soaked gelatine and stir and boil till it is dissolved; set aside to cool a little; beat eggs and sugar to a cream and add by degrees the milk, stirring constantly; return to fire and let it get boiling hot; but do not allow it to boil, otherwise it will curdle; remove from fire, pass it through a sieve and set aside to cool, stirring it occasionally; beat the cream until quite thick, gradually add the cold custard and continue beating for a little while longer; then put it in a freezer and freeze as directed.

266. Fine Vanilla Ice Cream.— Beat the yolks of 8 eggs to a cream and add gradually 1 quart sweet cream which has previously been boiled and cooled; add $\frac{3}{4}$ pound sugar, 2 teaspoonfuls vanilla extract and stir the whole over the fire until nearly boiling; then remove from fire and when cold strain it through a sieve and freeze as directed.

Raspberry, peach and apricot ice creams are made the same way.

281. How to Make Ice Cream Without a Freezer.— The process is so easy of manipulation and the expense incident thereto so small that most anybody can prepare it without any great trouble. All that is necessary for its preparation is a butter tub or a large pail, some ice, rock salt, a tin form with tube in the center and a cover that fits it closely. The ice is best broken to pieces by putting it into a coarse bag and pounding with a hatchet. By this process no ice is wasted and there is no muss.

282. Vanilla Ice Cream, No. 1.— Set a plain tin form with tube in the center into cracked ice and salt; place a saucepan with 1 quart milk, the yolks of 6 eggs, 1 cup sugar and 1 tablespoonful cornstarch over the fire and stir with an egg beater till nearly boiling; remove from the fire, set saucepan in cold water and continue stirring till cold; then add the whites of the 6 eggs, beaten to a stiff froth, and 2 teaspoonfuls vanilla extract; pour this into the form, put on the cover and paste a strip of buttered paper around its edge, to prevent the salt water from entering; put a thick layer of cracked ice in the bottom of a butter tub and sprinkle over it a handful of rock salt; set the form onto the ice and fill the space between it and tub with cracked ice and salt; lay a thick layer of ice on top of form and sprinkle with salt; cover the tub with a carpet or bag and let it stand in a cool place for 4 hours; when ready to serve take the form out of the ice, remove the paper, dip the form into hot water, quickly wipe dry, turn the cream onto a dish and serve.

283. Vanilla Ice Cream, No. 2.— Place a deep kettle into cracked ice and put into it 1 quart rich, sweet cream; beat this with an egg beater until thick and add 1 cup powdered sugar and 2 teaspoonfuls vanilla extract; put the cream into a tin form with a tube in the center, cover tightly, paste a strip of buttered paper around the edge of cover and finish the same as in foregoing recipe. NOTE.—For chocolate cream dissolve $\frac{1}{4}$ pound grated chocolate in $\frac{1}{2}$ cup water, let it boil for a few minutes and when cold stir into the whipped cream prepared as above. Preserved peaches cut into small pieces or preserved pineapples cut into dice and mixed with the whipped cream is very nice. 1 dozen macaroons pounded fine and mixed with the whipped cream is also excellent. Pumpernickel cut in slices, dried in an oven and rolled fine may also be used. Candied fruit cut into pieces and fresh or preserved strawberries, as also cherries, apricots and oranges, can be used in the same way. For a small family 1 pint of cream will be sufficient.

74

284. Fruit Ice Cream.— Stir 1 quart cream with the yolks of 6 eggs and $1\frac{1}{2}$ cups sugar over the fire till it nearly boils; remove from fire and when cold put the cream into the freezer and work till half frozen; then add any kind of fruit—either fresh strawberries or preserved pineapple cut into dice, ripe peaches cut into quarters, preserved pitted cherries or apricots; then finish as directed. The fruit may also be stirred into Custard Ice Cream in the same manner.

285. Fruit Ice.— The principal point in making fruit ice is to use the exact quantity of sugar. If the mixture contains too much sugar it will not freeze; if too little sugar the ice will be hard and dry. The better way is to try a little of it before putting the whole mixture into a freezer. If hard and dry add some thick sugar syrup; if it does not freeze at all add some cold water or a very thin syrup of sugar.

286. Cold Sugar Syrup for Fruit Ice.— Dissolve 1 pound sugar in 1 pint cold water and use as directed in following recipe. This is the ordinary syrup of 32 degrees used for fruit ice. If a thicker syrup is wanted dissolve 1 pound sugar in ½ pint water.

287. Strawberry Ice.— Wash and drain 1 quart ripe strawberries and press them through a sieve; mix the pulp with 1 pint sugar syrup, as in No. 286, and the juice of 2 lemons; press it through a fine hair sieve, put it into a freezer and freeze as directed.

75

288. Pineapple Ice.— Choose a large, ripe pineapple, pare and grate it, or cut into pieces, and chop fine; put the pulp into a porcelain dish and pour over it ½ pint sugar syrup; cover and let it stand 1 hour; then add another ½ pint sugar syrup and the juice of 1 lemon; press it through a sieve and put in a freezer to freeze.

289. Tutti Frutti Ice.— Pound ¾ pound blanched sweet almonds and 12 bitter ones with a little cold water very fine; pour over 1 pint water and let them stand for ½ hour; then press them through a hair sieve; mix this almond milk with 2 pints sugar syrup and 1 teaspoonful vanilla; put this into a freezer and freeze; when frozen take the paddle of the freezer out and put in different kinds of fruit cut into small dice—either fresh or preserved peaches, pineapples, plums, cherries or apricots.

290. Peach Ice.— Pare and cut 12 large, ripe peaches into pieces, press them through a sieve, mix with a little over 1 pint sugar syrup and freeze. Ices from egg plums and apricots are made in the same way.

292. Orange Ice.— Mix 1 quart sugar syrup with the juice of 10 oranges, put in the thin peel of 2 oranges and let it stand for 6 minutes; remove the peel, pour the syrup through a sieve and freeze as directed.

293. Lemon Ice.— Mix the juice of 5 lemons with 1 quart sugar syrup and freeze.

294. Sorbet is served in Europe at balls and suppers.

295. Champagne Sorbet.— Dissolve 1 pound sugar in 1½ pints cold water, add the juice of 2 lemons and 6 oranges and a little of the peel of each and let it stand 10 minutes; remove the peel, add ½ bottle champagne, put it into a freezer and work for ¼ hour; 10 minutes before serving add ½ bottle champagne, work it for a few minutes longer and then serve in glasses. Sorbet should not freeze hard; it should be a creamy liquid and ice cold.

76

296. Pineapple Sorbet.— 1 quart pineapple syrup, the juice of 3 oranges and 1 lemon; mix all together, strain and put into a freezer, work it for ½ hour and add by degrees during the freezing process ½ bottle champagne; finish the same as Champagne Sorbet. Sorbets of oranges, strawberries, peaches, cherries and apricot syrup are made in a similar manner.

297. Strawberry Sherbet.— Press 1 quart ripe strawberries through a sieve, add ¾ pound sugar dissolved in 3 pints cold water, add the juice of 1 lemon and 2 teaspoonfuls orange flower water, cover and let stand for 2 hours; then strain through a fine sieve and set on ice for 1 or 2 hours; serve ice cold in small glasses.

298. Orange Granite.— Mix 1 pint orange juice with 3 pints sugar syrup, as in No. 286, the juice of 2 lemons and the peel of 1; let it stand a few minutes then strain through a sieve; pour the mixture into a freezer, cover and turn for 5 minutes; then take off the cover, cut the frozen part loose from the sides of freezer, turn for a few minutes longer and serve. Granite must not be frozen hard; it should have little lumps all through it. Granites of strawberries, pineapples, raspberries, currants, peaches, apricots or cherries are made in a similar way. In granite of currants omit the lemon juice.

299. Spongada aux peches.— Pare and cut into pieces some ripe peaches, press them through a sieve and take for 1 pint peach pulp 1 pint sugar syrup, as in No. 286, 2 teaspoonfuls vanilla extract, 1½ gills white of egg not beaten and 10 bitter almonds pounded to a paste with a little water; mix all well together and strain twice through a sieve; pour this into a freezer, cover and turn for 5 minutes; take off the cover, cut the frozen part loose from the sides of freezer, cover and turn again; repeat the operation of cutting from the sides every 5 minutes; as soon as the mixture begins to thicken remove the paddle of freezer, work the mixture up and down with a large spoon and press it towards the sides and bottom of freezer; as soon as the contents of freezer have increased to double their size add 2 tablespoonfuls maraschino and serve in glasses.

77

300. Spongada au chocolat.— 1 pint sweet cream, ½ pound finely grated chocolate, ½ pound sugar, 2 teaspoonfuls vanilla extract, 1½ gills white of egg and 1 large cup water; boil the chocolate in the water for 5 minutes; when cold mix all the ingredients together and finish the same as in preceding recipe.

302. Spongada au marasquin.— 1½ gills white of eggs, 2 pints rich, sweet cream, 1½ cups sugar, 2 teaspoonfuls vanilla extract and 1½ gills maraschino; dissolve the sugar in the cream, add vanilla and the white of egg without having been beaten and finish the same as Spongada aux Pêches. The maraschino is to be added shortly before serving.

303. Orgeat of Almond Milk.— 1 pound sweet and 12 bitter almonds are scalded in boiling water, freed from their brown skins and laid for 1 hour in cold water; drain the almonds on a sieve and pound them fine with 1 pound sugar and a few spoonfuls water; put the pounded nuts into a porcelain dish, pour over them 4 quarts cold water, add 2 teaspoonfuls vanilla extract and strain through a napkin. The napkin should be well washed in cold water and wrung out previous to being used. Put this almond milk into glass bottles and place them on ice before serving.

304. Thé Polonoise.— Place a porcelain-lined saucepan over the fire with 1 bottle Rhine wine, 2 bottles weiss beer, the rind of 1 lemon, a piece of stick cinnamon, 2 whole eggs, the yolks of 6 and sugar to taste; beat the whole with an egg beater over the fire till nearly boiling; instantly remove, continue beating for a few minutes longer and serve hot in cups. This is served at the end of a ball or party shortly before the guests go home.

78

Apple marmalade may be used instead of apple jelly and put into the dish in alternate layers with the apples.

600. Apples (with Whipped Cream).— Pare, core and cut into quarters 1 dozen large tart apples; boil them in rich sugar syrup till tender, but not broken; remove the apples carefully to a glass dish; boil the syrup a little longer and pour it over the apples; when cold put over a thin layer of currant jelly and over this a thick layer of whipped cream sweetened with sugar and flavored with vanilla.

601. Peches à la Condé.— Boil 10 ounces rice for 5 minutes in cold water, drain in a colander and rinse with cold water; return the rice to saucepan with $1\frac{1}{2}$ pints sweet cream and boil until tender and thick; then add $1\frac{1}{2}$ tablespoonfuls butter, 4 tablespoonfuls sugar, a pinch of salt, 2 teaspoonfuls vanilla extract and the yolks of 4 eggs; butter a plain border mould, dust well with flour, put in the rice and bake 15 minutes; then set it in a warm place; pare and cut into halves $1\frac{1}{2}$ dozen peaches and boil them in sugar syrup till a straw will pierce through them easily; take the fruit out carefully and lay it on a sieve to drain; crack the pits, take out the kernels, scald them in boiling water, remove the brown skins and cut the kernels into strips; put them into the peach syrup and boil slowly till syrup begins to thicken; put the peaches back into the syrup and set them in a warm place; shortly before serving turn the rice border onto a round dish, put the peaches in center, pile them up, pour the syrup over the fruit and a little over the border and serve at once. Made of apples, peaches, pears, cherries, pineapples, currants or raspberries the same way. NOTE.—Stewed cherries or finely cut pineapples may be stirred into the cornstarch before putting it into the form and the border. When turned on the dish it may be decorated with fresh strawberries, cherries or raspberries. The cornstarch may be put into a round form. 605. Apples in Jelly, No. 1.— Pare 1 dozen Spitzenberg apples and remove the cores with an apple corer without breaking the fruit; put a wide kettle or saucepan over the fire with sufficient water to cover the apples, let it come to a boil, put in the apples and boil till a straw will easily pierce through them; then transfer them carefully to a long glass dish; boil the liquor down to 1 quart and add 1 cup sugar and 1 ounce gelatine soaked for 15 minutes in a little cold water; stir it into the apple syrup, boil for a few minutes and then set aside; when nearly cold pour the syrup over the apples and set on ice to get firm; serve with whipped cream or vanilla sauce. Peaches, pears or quinces are made the same way. Finely chopped nuts sprinkled over before the jelly has hardened or freshly grated cocoanut sprinkled over is a great improvement. Half these quantities will be sufficient for a family of 6.

606. Apples in Jelly, No. 2.— Pare 1 dozen pippin or greening apples, remove the cores without breaking the fruit and lay the apples into water with the juice of 1 lemon (this will keep them from turning); put the peels and cores of apples into a kettle, cover with water and boil until soft; strain first through cheesecloth and then through a flannel bag till the liquor is clear; return the liquor to kettle and when it boils put in the apples; boil until a straw will easily pierce through them; then remove the apples carefully to a glass dish; measure the apple water and allow 1 pound sugar for 1 pint water; boil the liquid 20 minutes; then add the sugar, boil 3 minutes and let it cool off a little; then pour it over the apples and serve when cold without sauce.

607. Apples (with Custard).— Pare, core and cut into quarters 6 large pippin or greening apples; put $\frac{1}{2}$ cup sugar with 1 cup water in a wide, low pan over the fire and boil 2 minutes; put in as many apple quarters as will lay in without crowding one another; boil until a straw will pierce through them easily; then take the apples out with a skimmer, lay them in a pudding dish and boil the remaining apples the same way; when the apples are all done and laid in the dish make a custard in the following way:—Beat 5 eggs until very light and add 4 tablespoonfuls sugar, 1 teaspoonful vanilla and 1 quart cold milk; pour this over the apples and bake till the custard is firm; when done remove the dish from oven and serve when cold with a napkin folded around the dish.

171

608. Apples (with Currant Jelly).— Take 6 large greening apples, 1 cup currant jelly and 1 cup sugar; pare, core and cut the apples into quarters and lay them in cold water; put the cores and peels in a saucepan, cover with water and boil till tender; strain them through a jelly bag and return liquid to saucepan; as soon as it boils put in some of the apples (not too many at once, so they do not crowd one another) and boil until a straw will easily pierce through them; then take them out carefully, lay on a dish to cool and boil the remaining apples the same way; when all are boiled again strain the liquid and boil it 20 minutes; then measure it; add to 1 pint liquid 1 pound sugar and stir until sugar is dissolved; then add the currant jelly and stir and boil 2 minutes; then remove from fire; rinse out a mould with cold water, sprinkle with sugar, lay in the apple quarters and pour the liquid when nearly cold over them; set on ice to get firm; in serving turn them onto a dish and lay a circle of whipped cream around the dish or the whites of 3 eggs beaten to a stiff froth and mixed with 1 tablespoonful powdered sugar; put the yolks of the 3 eggs with 2 tablespoonfuls sugar and 1 pint milk in saucepan and stir over the fire till just about to boil; add 1 teaspoonful vanilla and when cold serve with the apples. 611. Baked Apples, No. 2.— Wash and dry some large tart apples and remove the cores without breaking the fruit; set them in a long pan, add a little water and bake in a hot oven; when done transfer them to a dish, sprinkle over some sugar and serve hot.

612. Baked Apples and Cocoanut.— Pare and core 6 large greening apples without breaking them, set in a pan and fill each apple with sugar; boil the peels and cores in water till soft and strain them through a bag; pour the liquor over the apples, cover with another pan and boil on top of stove till they are half done; transfer the apples to another pan, sprinkle them thickly with freshly grated cocoanut mixed with sugar and set in oven to bake till done and to a light brown;

in the meantime strain the liquor the apples were boiled in into a saucepan and measure it; allow for 1 pint liquid 1 pound sugar and boil 5 minutes; when the apples are done remove them to a glass dish, pour over the apple syrup and sprinkle a thick layer of fresh cocoanut and sugar over; serve when cold.

173

Pound Sweets (baked).— Remove the cores from ½ dozen pound sweet apples without breaking them; put them in a long, shallow tin pan, add a little water and bake till tender; remove them to a glass dish, put into each apple 1 teaspoonful apple or currant jelly and dust them over with sugar; serve with or without sweet cream.

614. Pound Sweets (in Syrup).— Pare, core and cut into halves ½ dozen large sweet apples and lay them in cold water with a little lemon juice or a little vinegar; put the cores and peels over the fire, cover with water and boil till soft; strain through a coarse bag, return the liquor to saucepan and add the juice of 1 lemon, a little of the rind and 1 cup sugar; as soon as it boils put in the apples; let them boil until a straw will pierce through them easily; remove the apples to a dish and strain the liquor over them; serve when cold. A few whole cloves and a piece of cinnamon may be added if the flavor is liked.

615. Apples Baked with Jelly.— Pare and core 6 good sized greening or pippin apples and stick cloves all around the top near the opening into each one; put them in a tin pan in a hot oven, add ½ cup water and bake till done; put the peels and cores in a saucepan, cover with water and boil till tender; strain through a jelly bag, return the juice to saucepan and boil 20 minutes; then add for 1 pint juice 1 pound sugar and boil 10 minutes; remove the apples to a glass dish, pour the apple jelly over them and serve cold.

616. Apple à la Neige.— Pare, core and cut into quarters 6 large tart apples; put them in saucepan with the peel of ½ lemon, ½ cup water and cover and stew till the apples fall apart; then press them through a coarse sieve or colander (the former is the best), add ½ cup sugar and set aside; when cold beat the whites of 6 eggs to a stiff froth, slowly add the apple sauce and continue the beating for ½ hour; heap it on a glass dish, set lady fingers divided in two all around the dish with bits of currant jelly between and serve with the following sauce:—Stir the yolks with 4 tablespoonfuls sugar and 1 teaspoonful vanilla extract to a cream; add slowly 1 pint cold milk and serve with the above dish. Apple Sauce (economical).— Wash 1 dozen tart apples and cut them into pieces; put them over the fire in a porcelain-lined or agate saucepan, add 1 cup water, cover tightly and stew till tender; when done press them through a sieve or colander (the former is best), sweeten with sugar and serve. Apple sauce made in this way needs only half the apples, and is equally as nice when made right as if the apples were peeled. Apples should never be stewed in rusty tins or iron pots, as they will spoil the appearance of the sauce. Take either a porcelain-lined saucepan, an agate kettle, a new tin kettle or pan or a stone saucepan. Either of these are good for stewing fruit in.

619. Apples Stewed with Lemons.— Pare, core and quarter 12 good sized tart apples; put a kettle over the fire with 1 quart water, 1 cup sugar, 1 large lemon cut into thin slices and freed from the pits and boil for a few minutes; then put in the apples and boil until a straw will pierce through them easily; then remove from fire, put the apples into a dish and pour the strained syrup over them; serve either warm or cold.

620. Apples Stewed Whole with Currants.— Pare and core 1 dozen medium sized tart apples without breaking them; boil 1 cup sugar with 1 pint water to a syrup, put in the apples and boil till a straw will pierce through them easily; then take out the apples carefully; put ½ cup well washed and dried currants into the syrup and boil 5 minutes; pour it over the apples and serve when cold. Finely cut citron or seedless raisins may be used instead of currants, or use all three together.

175

If large pears are taken use a smaller quantity; if small pears are chosen use a larger quantity, leave them whole, cut the stems off half way and pare them.

654. Compote de Melons.— Select 1 large muskmelon (not too ripe), cut it in half, remove the seeds with a tablespoon, cut the melon into large pieces, pare off the skin and cut each long

piece in two; put the melon pieces in a saucepan, cover with boiling water and boil 5 minutes; take them out with a skimmer and lay the melon pieces on a dish to cool; put a kettle over the fire with 1 pound sugar and 1 pint water and boil a few minutes; put in the melon and boil 20 minutes; pour it into a dish, cover with paper and set in a cool place; when cold drain off the syrup, return it to kettle and boil slowly 10 minutes; then set aside to cool; pile the melon up high in a glass dish and pour the cold syrup over it. A piece of green ginger root or the juice of 1 lemon may be boiled with the melon.

182

655. Compote of Watermelon.— Select a nice, ripe watermelon, cut it in half, then into slices, remove the black pits and cut the red part into small pieces; take for 1 quart of such pieces 2 cups sugar, 1 pint water, a piece of green ginger and the juice of 1 lemon; put sugar, ginger and lemon juice over the fire and boil 5 minutes; put in the melon pieces and boil slowly about 20 minutes; pour into a dish and cover with paper; when cold drain off the syrup, return it to kettle and boil 10 to 15 minutes; arrange the melon nicely in a glass dish and pour the cold syrup over it; remove the ginger before sending to table. The white part of the melon may be used for preserving. If the melon is a large one part of it may be used for compote and the other part cut up into slices and served. A third part may be used as a fruit salad. (See Fruit Salad.)

656. Compote of Apples.— Choose medium sized tart apples, pare and cut them into halves, take out the cores, round the edges and lay them in cold water with lemon juice; boil 1 pound sugar with 1 pint water and the rind and juice of 1 lemon in a wide, low saucepan; put in the apples and let them boil 3 minutes; then turn the apples around, cover the pan and set it on side of stove, where they will stop boiling; let them stand 10 minutes; then thrust a straw through them; if it goes through easily they are done; if not, boil them for a minute longer; remove them from fire and set aside; when cold take the apples out of the syrup and lay them on a sieve; boil the syrup down until it thickens; pile the apples up in a glass dish and pour the syrup over when cold.

657. Compote de Strélicity.— Pare, core, cut into quarters and then into fine slices 12 large pippin apples; boil 1 cup sugar with 1 cup Rhine wine, 1 cup water, the juice of 1 lemon and 3 ounces finely sliced citron; put in the apples and boil them for a few minutes; then set aside to cool; soak 1 ounce gelatine in 1 cup water 20 minutes; add 1 cup boiling water and stir until dissolved; add it to the apples and boil for 1 minute; then remove from fire; when cold and beginning to thicken rinse out some small cups or forms with cold water, sprinkle each one with granulated sugar, fill them $\frac{3}{4}$ full of apples and set on ice; boil $\frac{3}{4}$ cup sugar with $\frac{1}{2}$ cup Rhine wine and a little lemon juice to a syrup and set it in a cool place until wanted; in serving turn the apples out of the cups, put them on a round or oval-shaped dish and pour the syrup over them; or serve the apples with whipped cream.

PIES.

658. Directions for Making Pies.— To succeed in making good pastry the following rules should be observed:—Flour should be of the best quality, dry and sifted before using. Butter, unless fresh, should be washed several times in cold water and dried in a napkin. Lard should be sweet, and is best when tried out from leaf lard. If suet is used it should be fresh, chopped fine and freed from all skin. During the process of chopping it should be dredged with flour. Beef dripping should be clarified, and if the dripping has any odor or by-taste a very disagreeable flavor will be imparted to the paste. Strict cleanliness must be observed. All utensils used for pastry making should be clean and kept exclusively for that purpose. Prepare the crust as quickly as possible and do not touch it with your hands any more than necessary. When the crust is ready take a pie plate (agate pie plates are the best) and dust it with flour; do not grease it with butter or lard. Cut off a portion of the crust, roll it out thin, lay it over the plate, press it down lightly with the hand, set the plate in front of you, press with the palms of both hands against the edge of plate and cut the paste which hangs over the edge off with your fingers. The plate is then ready to receive the ingredients of which the pie is to be made. If pumpkin, cocoanut or custard pie is to be made, brush the surface of crust over with beaten egg and sprinkle over 2 tablespoonfuls finely sifted bread or cracker crumbs; then fill in the mixture. This keeps the crust dry and prevents it from being heavy. Pies that are made of stewed or preserved fruit should also be treated the same way. For fine meringue pies the crust should be baked before the mixture is put in. This is done in the following manner:—Line the pie plate with crust and brush the edge over with beaten egg; then roll some pie crust very thin, cut it into strips 1 inch wide and cut one side of the strips into scallops with a knife; wet the edge of crust on the pie plate with beaten egg or water; then lay the strip around the edge of plate so the scallops stand a little above the edge; next lay some thin, buttered brown paper into the plate all over the crust, fill the plate with dry peas and bake it in a medium hot oven till crust is done; then take it from the oven, remove paper and peas, fill in the mixture and bake again till pie is done; draw the pie to front of oven, spread over the meringue and let it remain in oven for a few minutes; then transfer it to a cool place and serve cold. 1 or 2 quarts of dry peas should be kept for this purpose only. They may be put away in a box or glass jar and can then be used several times. If the peas should at any time become rancid from the butter or lard of which the pie crust is made, pour boiling water over them and drain and rub thoroughly with a dry towel; then spread them apart on shallow tins and when dry put away until wanted again. Instead of peas the pie plate may be filled with pieces of stale bread, which can then be used for bread crumbs; but peas are best for this purpose.

659. Pie Crust (quick and good).— 2 cups flour, $\frac{1}{2}$ teaspoonful salt, $\frac{1}{2}$ cup ice water and 1 cup lard; sift flour and salt in a bowl, add the lard and chop it fine with a knife in the flour; add the water and mix it with the same knife into a stiff paste; put the paste on a floured board and work

it for a few minutes with the knife; take a portion from it and roll it out thin; line a pie plate with it and fill the plate with the ingredients the pie is to be made of; roll out another portion of paste and spread over the top $\frac{1}{2}$ tablespoonful lard; lay this over the pie with the lard side up, press the paste off which hangs over the edge of plate with your hands and place the pie in oven to bake. This crust is excellent, inexpensive and quickly made; sufficient for 2 large pies.

185

660. Rich Pie Crust.— $\frac{1}{2}$ pound flour, $\frac{1}{2}$ teaspoonful salt, $\frac{1}{2}$ pound lard and $\frac{1}{2}$ cup ice water; sift flour and salt into a bowl, add the water and mix it into a paste; put the paste on a floured board and work it thoroughly for 5 minutes, or until it does not stick to the hands; then roll it out into a square about an inch in thickness; also shape the lard into a square, but 1 inch smaller than the paste; lay it in center of paste, fold the paste over and place it for $\frac{1}{2}$ hour on ice; then put it on the board again, dust it under and over with flour, roll it out 3 times as long as wide with a rolling pin, fold over one-third to the center, roll over it once, fold the other end over that, so the paste is three double, roll over it once with the rolling pin, turn the paste around, roll it out again 3 times as long as wide, fold it up the same way as before and set the paste again for $\frac{1}{2}$ hour on ice; repeat the folding and rolling twice more and let it rest each time for $\frac{1}{2}$ hour; when ready to make the pie roll a portion of the paste out very thin, line pie plate as directed with it and fill the plate with the ingredients the pie is to be made of; roll out another portion of the paste, spread the top thickly with lard, lay the paste over the pie with the lard side up and remove the paste which hangs over the edge of plate by pressing against the edge with the palm of your hand; sufficient for 2 large pies.

661. Fine Pie Crust.— 1 pound flour, 1 teaspoonful salt, $\frac{1}{2}$ pint ice water, $\frac{1}{2}$ pound lard, 6 ounces butter and the yolk of 1 egg; sift flour and salt in a bowl, add $\frac{1}{2}$ the lard and chop it fine in the flour with a knife; put the yolk in the ice water and beat it with an egg beater till it foams; then add it to the flour and mix it with the same knife into a stiff paste; turn the paste onto a floured board and roll it into a square piece about an inch in thickness; form the remaining lard and the butter also into a square piece, but $1\frac{1}{2}$ inches smaller on all sides; lay it in center of paste, fold it over the lard and butter together, first from right and left, then from and towards you; lay the paste onto a plate and let it rest for $\frac{1}{2}$ hour on ice; then put it on a board, dust under and over with flour and roll it out 3 times as long as wide, rolling always from you; fold over one-third to the center, roll over it once with the rolling pin, fold the other end over that, so the paste is 3 double, roll over it once with a rolling pin, turn the paste around, roll it out again 3 times as long as wide, fold it up the same as above and set the paste again for $\frac{1}{2}$ hour on ice or in a cool place; repeat the rolling out and folding up twice more and let it rest each time $\frac{1}{2}$ hour; after the last rolling let it rest 10 minutes and then use as directed; sufficient for 4 large pies.

186

662. Family Pie Crust.— $\frac{1}{2}$ pound butter, 6 ounces lard, 1 pound flour, 1 cup ice water and $\frac{1}{2}$ teaspoonful salt; sift flour and salt into a bowl, add the lard and chop it up with a broad-bladed knife into the flour until it is very fine; next pour in the ice water and mix it with the same knife into a smooth paste; turn it onto a floured board, dust under and over with flour and roll it out 1 inch in thickness; divide the butter into 3 parts; put 1 part in small bits in regular rows all over the paste; then fold it up, first the right side towards the left, then the left side towards the right, so the paste has 3 thicknesses; turn it around, roll it out again the same way, put over the second part of butter, fold it up and roll out again the same way; put over the third part of butter, fold it up and roll it out twice more; let it rest for 1 hour on ice or in a cool place; then use; while the rolling and folding is going on flour must be sprinkled under and over the paste; the rolling pin must be kept floured, to keep the paste from sticking to it. This paste may be made the day before it is to be used, and if it stands for 2 or 3 days it will not hurt it as long as the paste is kept in a cool place; sufficient for 4 large pies.

663. Fine Paste for Meat Pies, Patties and Baked Apple Dumplings.— Put 1 pound sifted flour on a paste board, make a hollow in center and put in the yolks of 3 eggs and $\frac{1}{2}$ pound butter; work this quickly with your hands into a stiff paste, adding by degrees a little ice water; then roll it out 1 inch in thickness and fold the right and left side to the center, so they meet together; then fold the other two sides over to the center the same way and set it for 1 hour on ice or in a cool place; when that time has expired lay the paste onto a floured board, roll it out 3 times as long as wide, fold one-third over to the center, roll over it once with the rolling pin, fold the other third over that, so the paste has 3 layers, roll out again 3 times as long as wide, fold it up the same way, let it rest for $\frac{1}{2}$ hour and roll and fold it up once more; then use. This paste is excellent for chicken, oyster, pigeon or beefsteak pie; also for baked apple dumplings and fine patties; sufficient for 1 large pie or for 9 apple dumplings.

187

664. Puff Paste.— 1 pound flour, a pinch of salt, 1 cup ice water and 1 pound butter; sift flour in a bowl, add salt and ice water and mix it into a smooth paste; work it thoroughly on the board with your hands for 5 minutes, cover and set it for 20 minutes on ice; knead the butter well in ice water, to remove the salt, and dry it in a napkin; put the paste onto a floured board and roll it out into a square about $1\frac{1}{2}$ inches in thickness; press the butter flat, also into a square, but smaller than the paste; lay the butter in center of paste and fold the paste first from the right and left side; then from you and towards you over the butter together; turn the paste over with the folded side towards the board; dust under and over a little flour and roll the paste out 3 times as long as wide; fold the lower third over the center and roll over it once with the rolling pin; then fold over that the upper third, so the paste is three double; roll over it once with the rolling pin; turn the paste around, roll it out again 3 times as long as wide, fold it again 3 double, lay it on a plate and set the paste for 1 hour on ice; then roll it out again and fold the same way twice; let it rest for $\frac{1}{2}$ hour on ice; roll and fold it twice more, so the paste has been rolled out and folded up 6 times; after the last rolling let it rest for 20 minutes and then use. The rolling out and folding together

188

must be done with the greatest care, so the layers fit exactly over one another, as the whole success depends upon this. The paste has attained its greatest lightness when rolled and folded together 6 times; if it is rolled out oftener it will loose in lightness; and if it is to be used where lightness is not wanted it must be rolled and folded together from 8 to 10 times. Puff paste is best made in a cool place, and if handy on a marble slab.

665. Short Paste (Mürber Teig—German art).— ½ pound sifted flour, 6 ounces butter, the yolks of 4 eggs, a pinch of salt, 1 tablespoonful sugar and the grated rind of ½ lemon; knead the butter in ice water, to remove the salt, and dry it in a napkin; put the flour on a board, make a hollow in center, put in the yolks, lemon, sugar, salt and butter and work it quickly into a smooth dough with your hands; set it on ice for 1 hour before using. Another way:—½ cup butter, the yolks of 3 eggs, 4 tablespoonfuls cream, ½ tablespoonful sugar, a pinch of salt and ½ pound flour; mix these ingredients together the same as above. Short paste (or Mürber Teig) is used a great deal in Germany the same as pie crust in America, and is excellent when made right. A very nice pie is made as follows:—Roll the paste out very thin, cover a pie plate with it (one which is not very deep), cut off what hangs over the edge of plate, spread a thick layer of any kind of fruit marmalade over it, cover with a thin layer of the paste and bake in a quick oven; or bake thin layers of the paste the same as Jelly Cake, and when done lay 2 together with jelly, fruit marmalade or whipped cream between them. Another way to use it is:—Roll the paste out ⅛ of an inch in thickness, cut it into rounds with a cake cutter, brush them over with beaten egg and sprinkle chopped nuts and sugar over them; bake in a medium hot oven and serve with wine.

666. Neapolitan Paste.— Scald 5 ounces almonds in boiling water and let them lay for a few minutes; then remove the brown skins and pound the almonds fine in a wedgewood mortar with the yolks of 4 eggs and 1 tablespoonful powdered sugar; sift 1 pound flour on a pastry board, make a hollow in center, put in ¾ pound butter, ½ pound powdered sugar, the almonds, 1 whole egg and 1 yolk and the finely chopped peel of 1 lemon; work this into a stiff paste and set it for 1 hour on ice before using.

189

667. Florentinian Paste.— Sift 1 pound flour on a pastry board, make a hollow in center, put in 1 cup butter, 1 cup sugar, 5 ounces grated chocolate, 2 whole eggs and the yolks of 5 hard boiled eggs rubbed through a sieve; add a little cinnamon and vanilla; knead this into a smooth paste and let it stand for 1 hour in a cool place before using.

668. Almond Paste.— Pour boiling water over ½ pound almonds, remove the brown skins, let the almonds lay in cold water for 24 hours and change the water 2 or 3 times; then pound the almonds in a wedgewood mortar with 2 tablespoonfuls water and the juice of ½ lemon; press them through a sieve and mix with ½ pound powdered sugar into a stiff paste; put the paste into a porcelain-lined saucepan and stir over the fire until it loosens itself from bottom of saucepan; remove the paste from the fire and when cold put some powdered sugar on a pastry board, lay the paste on the sugar and work it into a round ball; then set it in a cool place 1 hour before using.

669. Boiled Paste (Paté à choux).— Place a saucepan with 1 pint water or milk over the fire and add 1 cup butter, 1½ tablespoonfuls sugar, ¼ teaspoonful salt and the peel of 1 lemon; as soon as it boils sprinkle in slowly, stirring constantly, 1 pint sifted flour; continue stirring until it has formed into a smooth paste and loosens itself from bottom of saucepan; transfer the paste to a dish and let it cool; then mix it by degrees with 8 whole eggs and use for cream cakes, chocolate eclairs and other small cakes.

670. Nudels.— Sift 1 cup flour in a bowl and add a pinch of salt, a piece of butter the size of a hazel nut, 1 egg and 1 tablespoonful water; mix this into a stiff paste and work it well on a board so it does not stick to the hands; then divide it into 4 equal parts; roll each part out as thin as paper and let them lay on a board to dry for 10 minutes; then cut them into strips 1 inch wide; lay 4 strips over one another and cut them as fine as possible, like fine straws; when all are cut scatter the nudels all over the board and let them lay till dry; then use or put them away in a box; they will keep for some time. The yolks of 2 eggs may be used instead of 1 whole egg. Nudels are used for puddings or soufflés and serve as a dessert; they are also largely used in soup. They should always be put into boiling water, soup or milk and boiled 10 minutes when wanted for use.

190

671. Mince Pie.— 1 pound finely chopped boiled beef, ½ pound finely chopped suet, 1 pound well washed and dried currants, 1 pound stoned raisins, 1 pound finely cut citron, 1 pound sugar, ½ teaspoonful salt, the juice and a little grated rind of 2 oranges, the juice and grated rind of 1 lemon, 1 pint cider, ½ pint brandy, ½ pint sherry wine, 1 teaspoonful ground cloves, 1 teaspoonful cinnamon, 1 teaspoonful mace, 1 grated nutmeg and 3 pounds finely chopped apples; mix all the ingredients well together and use; sufficient for 6 good sized pies. If this mince meat, is to be kept for any length of time omit the apples and fill the mince meat into glass jars; close tightly and keep them in a cool place. It will then keep all winter. When wanted to make pies of take 1 jar at a time and mix the mince meat with an equal portion of chopped apples; line 2 pie plates with rich pie crust, fill them with the mince meat, cover with same crust as directed (see Directions for Pies), cut a small opening in center and one on each side of upper crust and place the pie in a medium hot oven to bake; when done remove it from oven and pour a little good brandy in center, sides and openings and serve warm. Mince pies will keep in a cool place for two weeks, but they should always be put for 10 or 15 minutes in the oven to heat through before serving. For a large quantity of mince meat put 8 pounds beef off the round in a kettle of boiling water, add 1 tablespoonful salt and boil till tender; when done remove the kettle from the fire and set aside to cool; then take out the meat, remove all skin, fat and hard part and chop the meat as fine as possible; then weigh the chopped meat and take for each pound the same ingredients as in above recipe; put it away in well closed jars without the apples.

191

672. Mock Mince Pie.— 3 finely rolled soda crackers, 1 cup well washed currants, ½ cup stoned raisins, ½ cup finely cut citron, ½ teaspoonful ground cloves, 1 teaspoonful cinnamon, ½ grated nutmeg, ½ teaspoonful salt, 1 tablespoonful butter, ½ cup sugar, ½ cup molasses, ½ cup brandy or wine, the juice of 1 orange and a little grated rind, the juice and grated rind of ½ lemon and ¼ pound dried apples; wash and stew the dried apples till tender; add the ½ cup sugar and sufficient boiling water to make 3 cupfuls stewed apples; set aside to cool; then mix them first with the rolled soda crackers, by degrees with all the other ingredients and use as directed for pies; sufficient for 3 medium sized pies or 2 large ones. A good plan is to leave a small opening in center of upper crust and when the pies are done pour a little brandy into it.

673. Apple Pie, No. 1.— Line a pie plate with crust as directed (see Directions for Pies); pare, quarter and cut greening or pippin apples into fine slices; fill the plate with apples, sprinkle over some sugar (about 2 tablespoonfuls for a medium sized pie), cover with crust and bake till apples are done and the crust has attained a delicate light brown color. If the flavor is liked a pinch of cinnamon and nutmeg may be added. In the spring of the year the juice of ½ lemon squeezed over the apples of each pie is a great improvement, as the apples have lost a great part of their flavor. Apple pies are best when eaten the same day they are baked. If they stand over till next day they should be put in the oven for about 10 minutes 1 hour before serving. They will then be as good as fresh pies; otherwise the crust is apt to be tough.

674. Apple Pie, No. 2.— Make an apple pie the same as in foregoing recipe; put ½ tablespoonful butter in small bits over the apples, grate over a very little nutmeg and a pinch of cinnamon, add no sugar, leave a small opening in center of upper crust and bake until done; in the meantime boil 1 cup sugar with ½ cup water 5 minutes; when the pie is done put a small funnel in the opening in center of upper crust and pour the syrup carefully through it into the pie; set the pie aside and serve when cold. The pie plate should be deep and large for this pie.

192

675. Apple Pie, No. 3.— Line a large, deep pie plate with fine pie crust, fill the plate with finely cut tart apples, sprinkle over ½ cup sugar, dust over a little flour and cover with crust; leave a small opening in center of upper crust and bake till done; 10 minutes before the pie is taken from the oven put a small funnel in the opening in the center of upper crust and pour carefully ½ cup sweet hot cider through the funnel into the pie; when done remove the pie from oven and serve when cold. Another way is:—Stew the apple peels and cores in water till tender; then strain them through a coarse bag, return the liquid to saucepan and boil 10 minutes; then add for 1 cup liquid 1 cup sugar, boil 10 minutes longer and pour the hot syrup into the pie in place of cider.

676. Apple-Citron Pie.— Line a deep pie plate with rich pie crust, fill it with finely cut tart apples, lay small pieces of butter between the apples, sprinkle over each pie ½ cup sugar and ½ cup finely cut citron, add 2 tablespoonfuls currant or apple jelly, cover with crust and bake till done.

677. Apple Meringue Pie.— Press 1 pint stewed apples through a sieve, sweeten to taste and add the juice of ½ lemon, a little grated nutmeg and the yolks of 4 eggs; line a pie plate with crust, cover with buttered paper, fill the plate with dried peas and bake till crust is a light brown; remove paper and peas, fill in the mixture, return pie to oven and bake till done; in the meantime beat the 4 whites to a stiff froth and add 1 tablespoonful powdered sugar and a little essence of lemon; when pie is done draw it to front of oven, spread over the meringue and let it remain for a few minutes longer in oven; then take it out and serve when cold.

678. Dried Apple Pie.— Wash ½ pound dried apples, put them in a saucepan with plenty of cold water, cover and place saucepan over the fire and stew till done; then add 1 cup sugar; pour the apples into a dish and set aside; when cold line 2 pie plates with fine pie crust, brush the surface of crust over with beaten egg and sprinkle over some bread or zwieback crumbs; fill in the stewed apples, cover with crust and bake till done. Dried peaches or apricots can be used the same way.

193

679. Tutti Frutti Pie.— Pare and cut fine 10 large tart apples, put them with 2 tablespoonfuls butter in a saucepan over the fire and add 6 tablespoonfuls sugar, 2 tablespoonfuls finely cut citron, ½ cup seedless raisins, the same quantity of well washed currants and the grated rind of ½ orange or lemon; stir this over the fire till apples are soft and add ½ cup currant or apple jelly; line a pie plate with fine pie crust, fill the plate full with the apples, cover with crust, in which a small opening should be cut in center, and bake till done; boil the peels and cores of apples with a little water till tender; strain them through a jelly bag, return the liquid to saucepan and boil 10 minutes; add to 1 cup liquid 1 cup sugar and boil 5 minutes longer; when pie is done take it from the oven, put a small funnel into the opening in center, pour carefully some of the apple syrup through the funnel into the pie and serve when cold.

680. Cherry Pie.— Line a pie plate with crust and remove the pits from 1 quart nice, ripe cherries; fill the fruit into the plate, sprinkle over some sugar and dust over a little flour; cover with top crust, with a small opening in center, and bake in a medium hot oven; in the meantime stew 1 cup cherries in a little water till tender; strain them, return the liquid to saucepan and boil 5 minutes; add to 1 cup liquid 1 cup sugar and continue the boiling for 5 minutes; remove from fire, add a little brandy or wine and pour this syrup, when pie is done, through a funnel into the pie. Another way is:—Do not stone the cherries; after the plate is lined with crust fill it full with cherries, dust over some flour, sprinkle them with sugar and add 3 tablespoonfuls water to each pie; cover with crust and bake till done. Another way is:—Boil ½ cup currant juice with ½ cup sugar for 5 minutes and when the pie (made like the first one) is done pour the currant syrup through a small funnel into the pie. This is an excellent way to give cherries which have not much flavor a nice taste.

194

681. Banana Pie.— 4 large bananas, 1 cup milk, 4 eggs, $\frac{1}{2}$ cup sugar, $\frac{1}{2}$ tablespoonful melted butter and 1 teaspoonful essence of vanilla; remove the skins and press the bananas through a sieve; mix them with the 4 yolks, sugar, milk, melted butter and vanilla; line a deep pie plate with crust, ornament the edge, lay in a piece of buttered brown paper, fill the plate with dry peas or with pieces of stale bread and bake till done; remove it from oven, free the plate from paper and peas, return the plate for a few minutes to oven again, fill in the banana mixture and bake till done; in the meantime beat the whites to a stiff froth and add 1 tablespoonful powdered sugar; draw the pie to front of oven, spread over the meringue, let it remain for a few minutes longer in oven, take it out, set it in a cool place and serve ice cold.

682. Pineapple Pie.— Pare 1 ripe pineapple, remove the eyes and hard core in center and chop it fine; line a deep pie plate with fine pie crust, fill it with the finely chopped pineapple, sprinkle over 1 small cup sugar and dust a little flour over; cover the pie with crust and bake a light brown and well done; put the eyes and cores of the pineapple with 6 greening apples cut into pieces in a saucepan, nearly cover them with water and boil till tender; then strain through a bag, return the liquid to saucepan and boil 20 minutes; then add for 1 cup liquid 1 cup sugar, boil 5 minutes and fill the jelly into tumblers. This makes an excellent pineapple jelly.

683. Pineapple Pie (with Meringue).— 1 large, ripe pineapple, $\frac{1}{2}$ cup milk, 1 cup sugar, the yolks of 4 eggs, 1 whole egg and $\frac{1}{2}$ tablespoonful butter; pare and grate the pineapple; then mix it with the sugar and other ingredients; melt the butter before adding it; line a deep pie plate with fine pie crust, cover with buttered paper, fill it with dry peas and bake till done; take it from the oven, remove the paper and peas, fill in the pineapple mixture and bake till done; in the meantime make the meringue, as follows:—

Beat the 4 whites to a stiff froth and mix it with 1 tablespoonful powdered sugar; when pie is done draw it to front of oven, spread over the meringue and return the pie for a few minutes to oven again till the meringue is a light brown; serve ice cold. This will make 1 large pie, sufficient for a family of 8 persons.

684. Prune Pie.— Wash and soak 1 pound prunes for 4 hours in cold water, drain them in a colander, remove the stones, put the prunes in a dish, pour over 1 cup cold water and let them stand over night; next morning line 2 pie plates with crust, put in the prunes with the liquor, sprinkle over some sugar and a little flour, cover with top crust and bake till light brown and well done. Another way is:—Stew the prunes in a little water, remove the stones, sweeten the prunes with sugar, add the juice of $\frac{1}{2}$ lemon and finish as above.

685. Peach Pie.— Pare and slice some large, ripe peaches; line a pie plate with crust, fill it with the peaches, sprinkle over some sugar and bake with an upper crust.

686. Peach Meringue Pie.— Line a large, deep pie plate with a rich pie crust, brush the surface of crust over with the beaten white of egg and sprinkle over 2 tablespoonfuls finely sifted bread or cracker crumbs; take 1 can preserved peaches, drain off the liquor, put them in the pie plate (with the hollow side up), sprinkle over a little flour, a few spoonfuls sugar, pour over some of the liquor and bake in a medium hot oven till done; in the meantime make the meringue, as follows:—Beat the whites of 5 eggs to a froth, mix them with 2 tablespoonfuls powdered sugar and flavor with a little essence of vanilla; when pie is done draw it to front of oven, spread over the meringue and bake for a few minutes longer; remove it from the oven and set the pie in a cool place; serve cold; sufficient for 10 persons.

687. Peach Mountain Pie.— Pare 1 dozen medium sized peaches; line a large deep pie plate with pie crust, fill the plate with the whole peaches, sprinkle over $\frac{3}{4}$ cup sugar, cover with a thin crust and bake in a medium hot oven.

688. Plum Pie.— Remove the pits from some ripe plums, sprinkle the fruit thickly with sugar and let them stand for $\frac{1}{2}$ hour; line a pie plate with crust, put in the plums, cover with crust and bake till done.

689. Cranberry Pie.— Wash and stew 1 quart cranberries with 1 cup water; when done press them through a colander or coarse sieve, return the cranberries to saucepan, add 2 cups sugar and boil and stir for 5 minutes; then set aside to cool; line a pie plate with fine crust, brush the surface of crust over with the beaten white of egg and sprinkle over 2 tablespoonfuls finely sifted bread crumbs; put in some of the cranberries, about $\frac{1}{2}$ inch thick, and cover with crossbars of crust (lattice-like); bake a light brown and well done; serve cold.

690. Gooseberry Pie.— Top, tail and wash the berries, put them into a pie plate lined with crust, sprinkle plenty of sugar among them, cover with crust and bake till done.

691. Blackberry Pie.— Line a deep pie plate with crust; have some ripe blackberries washed and drained; fill the plate with the berries, sprinkle over some sugar, pour into each pie 1 tablespoonful vinegar, dust over a little flour, cover with crust and bake a light brown and well done.

692. Huckleberry Pie.— Wash and drain some ripe huckleberries; line a pie plate with crust and cover the bottom of crust with 2 tablespoonfuls finely rolled zwieback; next fill the plate with the berries, sprinkle sugar between and over the fruit, add a little more zwieback, cover with crust and bake in a medium hot oven to a light brown and well done; serve cold dusted with sugar.

693. Currant Pie.— Wash and strip some ripe currants and mix them with the same quantity of sugar; line a pie plate with fine pie crust, fill it with the fruit, dust over some flour, cover with top crust, press the edges firmly together and bake till done and to a light brown. Raspberries and

currants may be used together for this pie.

694. Rhubarb Custard Pie.— Stew 2 cups finely cut rhubarb with 2 cups sugar and $\frac{1}{2}$ cup water; when done strain the rhubarb through a sieve and mix it with 2 well beaten eggs; have a deep pie plate lined with rich pie crust, fill in the mixture, lay fine strips of pie crust across the pie (lattice-like), place the pie in a hot oven and bake till the custard is firm and the crust a light brown.

695. Rhubarb Pie.— Line a pie plate with some rich pie crust; remove the skin from some fresh rhubarb and cut it into fine pieces; take for every cup rhubarb 1 cup sugar, fill it into the plate and dust over a little flour; cover with crust and bake till done, which requires about $\frac{1}{2}$ hour; serve cold dusted with powdered sugar.

696. Rhubarb Meringue Pie.— Place a saucepan with 2 cups finely cut rhubarb, 2 cups sugar and $\frac{1}{2}$ cup water over the fire and stew 20 minutes; when done press the rhubarb through a sieve, add the beaten yolks of 4 eggs and set aside; line a deep pie plate with crust, ornament the edge, cover with buttered paper, fill the plate with dry peas and bake till crust is a light brown; then remove paper and peas, fill the plate with the rhubarb mixture and bake about 15 minutes; beat the 4 whites to a stiff froth and mix them with 1 tablespoonful powdered sugar; draw the pie to front of oven, spread over the meringue, bake for a few minutes longer and serve when cold.

697. Sweet Potato Pie.— 3 medium sized sweet potatoes, 3 eggs, 1 pint milk, $\frac{1}{2}$ cup sugar, 1 tablespoonful butter, 1 teaspoonful ginger, $\frac{1}{2}$ teaspoonful cinnamon, $\frac{1}{2}$ grated nutmeg and $\frac{1}{4}$ teaspoonful salt; boil the potatoes until done; scrape off the skin and press the potatoes through a sieve or colander; mix them first with the eggs and salt, then add the melted butter, sugar and spice and lastly the milk; line a large, deep pie plate with rich pie crust, fill in the mixture and bake till done; serve when cold.

698. Pumpkin Pie.— Pare and cut a medium sized pumpkin into pieces, remove the pits, put the pumpkin in a kettle, cover with boiling water, add $\frac{1}{2}$ tablespoonful salt and boil till tender; when done put the pumpkin into a colander and drain off all the water; then press it through the colander; measure the strained pumpkin and take for every quart of it 1 pint milk, $\frac{1}{2}$ tablespoonful melted butter, $1\frac{1}{2}$ cups sugar, 3 eggs, 2 teaspoonfuls cornstarch mixed with the milk and 1 teaspoonful ground ginger; mix all the ingredients together; dust some deep pie plates with flour, line them with pie crust and brush the surface of crust all over with beaten egg; roll out some pie crust and cut it into strips 1 inch wide; cut one side of the strips into scallops and lay it around the edge of plate so the scallops stand a little above the edge of plate; brush the strip over with beaten egg and sprinkle 2 tablespoonfuls fine bread or cracker crumbs over the crust (this keeps the pumpkin from sogging into the crust); fill the plate with the pumpkin mixture, grate over the top some nutmeg and bake till done; when the pumpkin is firm to the touch of your finger and a little brown on top the pie is done; remove it from oven, set in a cool place and serve when cold. A medium sized pumpkin will make 4 medium sized pies. A good plan if the family is small is to fill some of the boiled pumpkin as soon as done, boiling hot, into glass jars. Close the jars at once and set them in a cool place. When wanted for use open the jar, turn the pumpkin into a colander, drain off all the water, press the pumpkin through a colander and finish the same as above.

Care must be taken to remove the pie as soon as done, otherwise it will curdle. To ascertain when pie is done stick the handle of a teaspoon into center of custard. If no milk is to be seen and the custard is thick the pie is baked. Remove at once and serve ice cold.

rounds in the pan with the side which was rolled towards the pan and not too close together; brush the top over with beaten egg, being careful not to let any of the egg run down the sides; then dip a smaller cake cutter into hot water, press it on each round $\frac{1}{8}$ of an inch deep to form the cover; the cake cutter must be dipped in the hot water each time for each round; then bake them in a hot oven to a golden color; when the tarts are done take them out, cut the cover loose with a pointed knife and lift it off; hollow the tarts out a little with your finger; when ready to serve fill them with jelly. These tarts may be filled with stewed oysters or clams. They are then called Oyster or Clam Patties.

712. Tarts.— Line some small patty pans with rich pie crust or puff paste and fill them with either fruit marmalade of peaches, apricots, cherries or any kind of preserved or stewed fruit; roll the paste which is left out thin and cut it into strips $\frac{1}{4}$ inch in width; lay them over the tarts like lattice work, brush over with beaten egg and bake in a hot oven.

713. Peach Tarts.— Pare and cut some nice, ripe peaches into halves and boil them for 5 minutes in sugar syrup; take them out and set aside to cool; boil the syrup 5 minutes longer; line some patty pans with rich puff paste or pie crust, put into each a piece of buttered paper, fill them with dry peas and bake in a hot oven till nearly done; remove the paper and peas and fill each one with the peaches and a little syrup; return them to the oven again and bake till done; serve when cold.

719. Tartelettes of peaches, plums, apples, cherries, currants, raspberries or gooseberries are made the same way as apricots.

720. Tartelettes of Strawberries.— Roll out $\frac{1}{2}$ pound puff paste about $\frac{1}{8}$ inch in thickness and cut out with a round cake cutter 10 rounds; lay them into 10 small buttered patty pans and press the paste in evenly; let the paste stand a little higher than the pan; mix flour and water to a stiff dough, divide it into 10 equal parts the size of a walnut, roll it out into balls and put into each form a ball; press them in firmly and bake in a hot oven; when done draw them to front of oven, dust over with sugar and return them to oven again so they obtain a glaze; then remove the inside water dough and set the tarts aside to cool; roll out thin the remaining puff paste and cut out small rings; lay them on shallow buttered tins, dust them with sugar and bake in a slow oven; press $\frac{1}{2}$ pint strawberries through a sieve and mix them with 3 tablespoonfuls powdered sugar; wash and drain $\frac{1}{2}$ quart strawberries, put them in a dish, pour the mashed strawberries over the whole fruit and fill them into the tartelettes; lay onto each one 2 rings and serve them on a napkin. Raspberries and currants stewed together may be used instead of strawberries. Stewed cherries, peaches, apricots, plums or any kind of preserved fruit may also be used.

721. Fleurons of Puff Paste.— Roll the puff paste out $\frac{1}{8}$ inch in thickness, cut it with a cake cutter into shapes of half moons, lay them on tins, brush over with beaten egg and bake in a quick oven. Fleurons are used for garnishing dishes.

724. Condés.— Chop fine 6 ounces blanched almonds and mix them with 3 tablespoonfuls powdered sugar and the beaten whites of 1 or 2 eggs; roll out some rich puff paste very thin, spread over the almond mixture and dust over some powdered sugar; cut them into finger lengths 2 inches wide and bake in a slow oven.

726. Paté à choux.— Place a saucepan over the fire with 1 pint water or milk, $\frac{1}{2}$ pound butter, $1\frac{1}{2}$ tablespoonfuls sugar, the grated rind of 1 lemon and a pinch of salt; as soon as it boils add slowly $\frac{1}{2}$ pound sifted flour, stirring constantly; stir until it forms into a smooth paste and loosens itself from bottom of saucepan; transfer the paste to a dish and when cooled off a little mix it by degrees with 6 or 8 eggs. This paste should be soft, but must not run apart when dropped on a tin.

727. Chocolate Eclairs.— Prepare a pâté à choux, put it into a pastry bag or paper funnel and squirt it upon buttered tins in long narrow cakes 4 inches long and 1 inch wide; brush over with beaten egg and bake in a medium hot oven; when done brush them over with boiled chocolate glaze and set for a few minutes in oven again; then set them aside in a cool place; shortly before serving cut each one open on the side and fill with vanilla cream. For cream cakes drop this mixture (by tablespoonfuls) onto buttered tins, not too close together and in the form of round cake; when cold slit them open on one side and fill with vanilla cream.

728. Canapes.— Prepare a puff paste and roll it out $\frac{1}{2}$ inch in thickness; cut it out into square pieces of 2 inches wide, cut these again into strips of $\frac{1}{2}$ inch wide, lay them with the cut side in a shallow tin pan, not too close together, and bake in a hot oven; when done draw them to front of oven, dust with sugar and let them remain in oven a few minutes longer to glaze; put two and two together with jelly between; or they may be served single.

729. 730. Vole-au-vent.— Carefully prepare 1 pound puff paste and roll and fold it 6 times; great care must be taken in doing this, as the whole result depends upon it; after the last rolling let it lay in summer $\frac{1}{2}$ hour on ice, in winter in a cold place; when ready to use roll the paste out 1 inch in thickness, place the dish on which the vol-au-vent is to be served upside down onto the paste and cut off the paste from the dish; turn the paste around and lay it on a tin which has been dampened with water; make with the back of a knife a few dents in it around the edge, brush the top over with beaten egg and make with the point of a knife a slight incision in the paste all round the top about $1\frac{1}{2}$ inches from the edge; this forms the cover; bake in a very hot oven; do not open the oven for 10 minutes; then open and if the vol-au-vent is a light brown cover with paper and bake from $\frac{3}{4}$ to 1 hour; when done remove the cover, put the vol-au-vent onto the dish it was made to fit and set it for a few minutes in the oven to dry; then fill with either ragouts or fricasseed chickens, birds, rabbits or pigeons, put on the cover and serve; or fill it with fresh or preserved fruit and serve as a dessert.

731. Vole-au-vent (with Strawberries and Whipped Cream).— Roll out some carefully made puff paste $\frac{3}{4}$ inch in thickness and cut it out with a fluted cutter the desired shape, either round or oval; make a slight incision in the paste 1 inch from the edge and bake in a very hot oven; when nearly done brush it over with white of egg, dust with sugar and put it back in the oven to glaze; when done remove the interior, or soft crumbs, and fill the vol-au-vent shortly before serving with fresh strawberries sweetened with sugar and cover them with whipped cream.

732. Vole-au-vent (with Currants and Raspberries.)— Prepare a vol-au-vent the same as in foregoing recipe; strip some large, ripe, cherry currants from their stems, put them in a colander with the same quantity of raspberries, let cold water run over and drain them well; put the fruit into a dish with plenty of sugar, mix them up with 2 silver forks and let it stand in a cool place for several hours; shortly before serving put the fruit into the vol-au-vent, put over the cover, again

dust with sugar and serve.

733. Vole-au-vent (with Peaches and Cream) is made the same as strawberries. Preserved pineapples, apricots, cherries or plums may be used in the same manner; also oranges peeled and cut into slices, freed from their pits and well sugared. Put into the vol-au-vent and serve either covered with its own cover or whipped cream. Makes an excellent dish for dessert.

734. Neapolitan Breads.— Mix a finely chopped orange peel (only the yellow part) with $\frac{1}{2}$ pound neapolitan paste; divide it into small pieces the size of a walnut, roll these lengthwise about $\frac{1}{2}$ finger thick, bread 3 together, brush them over with beaten egg and bake in a medium hot oven; or the paste may be rolled into long, thin rolls, breaded together and then cut into lengths $2\frac{1}{2}$ inches long.

735. Viennoises.— Stir $\frac{1}{2}$ cup butter with $\frac{1}{2}$ cup powdered sugar to a cream and add the yolks of 5 eggs, 1 teaspoonful vanilla extract, $1\frac{1}{2}$ cups sifted flour, $\frac{1}{4}$ cup cornstarch and lastly the beaten whites of 2 eggs; spread this over a sheet of buttered paper $\frac{1}{2}$ inch in thickness, lay the paper in a shallow tin and bake in a slow oven; when done cut the cake into 2 pieces; cover one piece with pineapple or peach marmalade and lay the other piece over it; also cover the top with marmalade and glaze the whole with wine glaze; then cut the cake at once into small, long pieces and set them in the oven again for a few minutes.

736. Almond Tartelettes.— Pound $\frac{1}{4}$ pound blanched almonds with $\frac{1}{4}$ cup water in a mortar to a paste and press it through a sieve; mix it with $\frac{1}{4}$ pound powdered sugar; next add the beaten whites of 4 eggs and the juice of $\frac{1}{4}$ orange; have $\frac{1}{2}$ pound puff paste prepared, rolled out and folded 10 times; line 8 or 10 small tin patty forms with the paste, fill them $\frac{3}{4}$ full with the above almond mixture and bake in a medium hot oven; when nearly done draw them to front of oven, dust over some fine sugar and bake till done.

737. Puites d'amour.— Prepare 10 ounces puff paste and roll it out $\frac{1}{2}$ inch in thickness; cut out into 20 rounds, about 2 inches in diameter, with a scalloped tin cake cutter; cut a round piece out of the center of each one, so that only a ring remains; roll out the remaining paste the same way, cut out 20 rounds, lay them in a tin pan and brush over with the white of egg; put on the rings, brush the top over with beaten egg and bake in a hot oven; when done dust them over with sugar and let them remain for a few minutes longer in oven to glaze; remove and shortly before serving fill them either with whipped cream sweetened and flavored with vanilla or some preserved fruit. NOTE.—Care must be taken not to get any egg on the outside of tart, as this will prevent the rising.

210

738. Neapolitans.— Take neapolitan paste, roll it out thin, brush over with egg and bake in buttered tins to a light brown color; when done cut the cake into two pieces; spread one piece with fruit marmalade or jelly and lay the other over it; cut the whole into small pieces, pour over a wine or maraschino glaze and set them for a few minutes in the oven.

739. D'Artois Grilles.— Prepare $\frac{1}{2}$ pound puff paste, roll it out and fold over 10 times; roll out one-half into a thin, square piece; put this into a square, shallow tin pan, wet the edge with beaten white of egg, spread over a thick layer of apricot or peach marmalade and over this a thick layer of apple marmalade 1 inch from edge; roll out the remaining paste, cut into strips, lay it over the marmalade like lattice work, brush over with beaten egg and bake; when done dust over some sugar, let it remain for a few minutes longer in the oven and cut into pieces when cold. Another way is to line a pie plate with puff paste, spread over a layer of apple marmalade flavored with vanilla and bake; when done spread over a thin layer of apricot marmalade and pour over this a sugar glaze; make it smooth with a knife and cut into pieces before the glaze becomes hard.

740. Cream Tarts.— Line small patty forms with short paste (Mürber Teig), fill them with vanilla cream (see Cream) and bake in a hot oven; when done spread a thin layer of peach marmalade over the cream, pour over the marmalade a little lemon glaze and let them dry for a few minutes in front of oven; mix the beaten white of 1 egg with $\frac{3}{4}$ cup sugar and 3 drops lemon juice; put this into a paper funnel, squirt a wreath over the glaze and put $\frac{1}{2}$ teaspoonful apple jelly in the center.

211

cored, onto each square and put into each apple a small piece of butter and a little sugar; bring the 4 corners of paste together on top of the apple, fasten them with a little white of egg, put in a long, shallow pan and set in a medium hot oven to bake till done; serve with hard or wine sauce; if the oven is too hot cover them with paper. To ascertain when dumplings are done thrust a knitting needle into them. If it penetrates through the apples easily they are done; if not, the baking must be continued until they are done.

784. Apple Dumplings (bain-Marie).— 1 pound flour, 1 teaspoonful baking powder, $\frac{1}{2}$ teaspoonful salt, 1 cup cream or milk and $\frac{3}{4}$ cup butter; sift flour, salt and powder into a bowl, add the milk and mix it into a paste; roll it out on a floured board into a square piece about $1\frac{1}{2}$ inches in thickness; form the butter into a square piece and lay it in the center of paste; fold the paste over it, first from the right and left side, then from you and towards you; put it on a tin plate and set in a cool place for $\frac{1}{2}$ hour; next roll it out 3 times as long as wide, fold it together and lay one end over the middle; then the other end over that, so the paste is 3 double; roll and fold it twice more the same way; then roll it out thin, butter and dust 8 cups with flour and line them with the crust; fill them with finely sliced tart apples and sugar, cover them with the same paste and set the cups in a pan of hot water; put them in the oven to bake; when done turn them onto a dish, dust with sugar and serve with 2 sauces—a wine or nutmeg sauce and a hard sauce. These dumplings can be made with any kind of fruit.

785. Steamed Apple Dumplings.— Prepare a fine puff paste, cut it into squares and inclose in each square a nice peeled and cored, juicy apple; lay the dumplings into a steamer, cover tightly, set the steamer over boiling water and let them steam till done, which will take from 1 to $1\frac{1}{2}$ hours; serve with brandy, hard or sherry wine sauce. Instead of puff paste a fine pie crust may be used.

Dumplings boiled in this way are dry and light. $\frac{1}{2}$ cup of lard may be substituted for the suet.

787. Boiled Apple Dumplings, No. 2.— $\frac{1}{2}$ pound lard, 1 pound sifted flour, 1 teaspoonful salt and $\frac{1}{2}$ cup cold water; put flour, lard and salt in a bowl and chop the lard fine with a knife in the flour; add the water and mix it with the knife into a stiff paste; put the paste on a floured board and roll it out about $\frac{1}{2}$ inch in thickness; fold it up and roll it out again about $\frac{1}{8}$ of an inch thick; cut into squares and lay in the center of each a pared and cored juicy, tart apple; bring the corners of the squares neatly together and press them lightly; inclose each dumpling in a small square cloth, bring the 4 corners together and fasten with a pin; each cloth should be previously dipped in hot water, wrung out and dusted with flour on the inside before the dumpling is put into it; drop them into boiling water which is slightly salted, boil $\frac{1}{2}$ hour and serve with cherry wine sauce. NOTE.—A good pie crust can also be used for this purpose. Peach, plum and cherry dumplings are made the same way. The above ingredients will make about 8 dumplings. $\frac{1}{2}$ pound finely chopped suet may be used instead of lard.

788. Lemon Dumplings.— Mix 2 cups prepared flour with 2 eggs, 1 tablespoonful butter or $\frac{1}{2}$ cup finely chopped suet, $1\frac{1}{2}$ tablespoonfuls sugar, the juice and half the grated rind of 1 lemon and finish the same as Orange Dumplings; serve with cherry wine sauce or prepare a sauce the same as for Orange Dumplings and flavor with lemon instead of oranges.

Orange Dumplings.— 2 cups prepared flour, 2 eggs, 2 teaspoonfuls butter, 1 tablespoonful sugar and 1 cup water; mix this into a thick batter; pare 3 nice oranges, cut them into small pieces and remove the pits and all the skin, so that there is nothing left but the meat of the oranges; stir this into the batter; have a kettle of boiling water on the stove with a little salt; next drop the mixture with a tablespoon into the boiling water, taking care not to put too much in at once; cover the kettle and boil the dumplings just 10 minutes; remove them with a skimmer to a warm dish and serve at once with the following sauce:—Stir 2 tablespoonfuls butter with 1 cup powdered sugar to a cream and add by degrees 1 egg, 2 tablespoonfuls brandy or wine, the juice of 1 orange and a little grated rind. Cherries, peaches, pears, plums, blackberries or huckleberries may be used instead of apples.

791. Strawberry Dumplings.— 1 cup beef suet freed from strings and chopped fine, 3 cups sifted prepared flour, 1 tablespoonful sugar and 2 eggs; mix with $\frac{3}{4}$ cup cold water to a soft dough; shape into large balls with floured hands, put into a dumpling cloth that is buttered and floured on the inside and fasten the 4 corners of the cloth together with a pin; drop into slightly salted boiling water and boil till done, which will take about $\frac{1}{2}$ hour. The best way to ascertain if

dumplings are done is to thrust a knitting needle into them. If no dough clings to it and the needle comes out clean they are done and must be instantly removed from fire, taken from the cloth, laid on a warm dish and served at once; serve with the same sauce as the following recipe.

These dumplings may be made of all kinds of fruit—peaches, cherries, plums, pears or apricots.

793. Fine Fruit Dumplings.— Pare and quarter some peaches, apples or pears and boil them in sugar syrup until done, but in such a way that the pieces stay whole; then take them out with a skimmer and lay on a long dish; in the meantime prepare some dumplings as follows:—Place 1 cup milk with 1 tablespoonful butter over the fire; as soon as it boils stir in 1 cup sifted flour and stir constantly until it has formed into a smooth dough and loosens itself from the bottom of saucepan; after the dough has cooled stir 1 tablespoonful butter to a cream and add by degrees the yolks of 3 eggs, the dough, 1 tablespoonful dry farina and lastly the whites beaten to a stiff froth; form the mixture with a tablespoon into dumplings and drop them into the boiling syrup in which the fruit was boiled; when done take them out with a skimmer and lay in a circle around the fruit; pour the syrup over them and serve. Biscuit au beurre.— $\frac{1}{2}$ pound powdered sugar, $\frac{1}{4}$ pound sifted flour, $\frac{1}{4}$ pound cornstarch, $\frac{1}{2}$ pound melted butter, 7 eggs and the grated rind of 1 lemon; beat the 7 whites to a stiff froth and add by degrees the yolks and sugar; set this on a hot stove and beat till it is warm; then remove it and continue the beating until nearly cold; strain the melted butter into a cup and continue the beating with the right hand; hold the cup with the melted butter in the left hand; pour butter into the mixture gradually; next stir in the sifted flour and cornstarch; butter a round cake pan and line it with buttered tissue or waxed paper; pour in the mixture; cover the bottom of a pie plate with salt, set the pan with cake onto this and bake $\frac{3}{4}$ hour in an oven not too hot; if it browns too much put paper over it.

241

820. Fine Sponge Cake.— 1 pound powdered sugar, 12 eggs and not quite 1 pound (about 2 tablespoonfuls less) of flour; then add the grated rind and juice of 1 lemon; put the flour into a tin pan and set it in front of oven to get warm; put the eggs, sugar and lemon into a deep stone mixing bowl; set the bowl into a large dishpan of hot water in such a way that the bowl is half covered with water; beat the contents of bowl with an egg beater for $\frac{3}{4}$ hour; then slowly add the flour, continue the beating for a few minutes longer and pour the mixture into a large round pan or 2 medium sized ones; the pan should be previously well buttered and lined with fine brown buttered or waxed paper; bake 1 hour in a slow oven. Sponge cake made according to this recipe is elegant, but care must be taken to follow the instructions exactly. Half these quantities will make a good sized cake. If the oven should be rather hot at the bottom put in a large pie plate with salt, set the pan with cake onto it and bake.

821. Delicate Sponge Cake.— 9 eggs, $1\frac{1}{2}$ small cups granulated sugar, $1\frac{1}{2}$ small cups flour (sifted 3 times) and the grated rind and juice of 1 lemon; put the 9 yolks in a bowl and the whites into a deep dish; add to the yolks $\frac{1}{2}$ the sugar and stir them to a cream; beat the whites to a stiff froth and add the remaining sugar, beating constantly; then add slowly, in small portions, the

creamed yolks; next the lemon; continue the beating with an egg beater until all is well mixed; then stir in lightly the sifted flour; butter a long, shallow pan and line it with buttered paper; pour in the mixture and bake in a slow oven $\frac{3}{4}$ hour to a delicate brown; when done carefully remove the cake from oven and let it stand for a few minutes before taking out of the pan. This cake may be iced either with clear icing or wine or fruit glaze.

822. Marguerites.— $\frac{1}{4}$ pound flour, $\frac{1}{4}$ teaspoonful salt, $\frac{1}{4}$ pound sugar, 1 whole egg, the yolk of 1 egg, 1 heaping teaspoonful anise seed, the grated rind of $\frac{1}{2}$ lemon, $\frac{1}{2}$ cup lukewarm water and 2 tablespoonfuls melted butter; measure after the butter is melted; sift the flour in a bowl, add salt, sugar, grated lemon peel, the eggs and mix the whole with the water into a batter; lastly add the butter and anise seed; put a wafer iron over the fire; when hot brush it over with melted lard; put 1 teaspoonful of the batter in the center of wafer iron, close it and bake the cake a light brown on both sides; as soon as one is done take it from the iron and roll up like a tube; continue to bake the remaining batter the same way; these quantities will make 50 cakes. 2 teaspoonfuls of vanilla sugar may be used instead of anise seed. These cakes may be served either with ice cream, wine or coffee.

823. Macaroons.— Scald $\frac{1}{2}$ pound sweet almonds with a few bitter ones, remove the brown skins and spread the nuts out on paper to dry; then pound them in a wedgewood mortar to a paste with the whites of 2 eggs and add 2 teaspoonfuls vanilla sugar or the grated rind of 1 lemon; mix it with $\frac{1}{2}$ pound powdered sugar and 2 tablespoonfuls clear icing made as follows:— Take $\frac{1}{2}$ the white of 1 egg, mix it with 2 tablespoonfuls sifted powdered sugar and stir for a few minutes; then add it to the almonds; mix the whole into a firm paste and form with the hands into small round balls the size of a hickory nut; line some shallow tin pans with brown paper (such as is used for wrapping paper), but do not butter it; set the balls in even rows, one inch apart, on the paper, flatten each one a little with a wet finger and bake them in a medium hot oven to a golden color; when done wet a pastry board with cold water and lay the macaroons on the wet board with the paper side towards the board; after 5 minutes the macaroons may be lifted from the paper, as the dampness loosens them; the above quantities will make 50 macaroons. Great care should be taken to use the exact amount of ingredients here stated.

824. Cookies.— 1 cup butter, 2 cups sugar, 2 eggs, the grated rind of 1 lemon and 1 teaspoonful baking powder; stir the butter and sugar to a light white cream and add the eggs 1 at a time; sift the powder with 2 cups flour, add it to the mixture and work the whole with sufficient flour into a stiff dough; roll it out $\frac{1}{8}$ inch in thickness, cut with a cake cutter into rounds and bake them a light brown in well buttered shallow tin pans.

825. Butter Cakes.— 1 yeast cake 1 quart sifted flour, $1\frac{1}{2}$ pints warm milk or water and 1 teaspoonful salt; dissolve the yeast in a little warm water; sift the flour and salt into a mixing bowl, make a hollow in center, pour in the yeast and water, mix into a batter and let it stand over night (this is called setting a sponge); next morning stir 1 cup sugar with $\frac{1}{2}$ cup lard and $\frac{1}{2}$ cup butter to a cream and add 2 eggs, 1 at a time, stirring a few minutes between each addition; then add the grated rind of 1 lemon and a very little powdered cardamon; mix this thoroughly with the sponge, add sufficient sifted flour to make a soft dough, cover it with a clean cloth and set in a warm place to rise to double its height; then butter 4 long, shallow tin pans (12 inches long, 8 inches wide and 1 inch deep) and dust each one with flour; when the dough has attained the desired lightness divide it into 4 equal parts; roll each part out on the pastry board, put it into the pan, press evenly all over and again set it to rise to top of pan; when ready to bake brush each cake over with melted butter, sprinkle over 2 tablespoonfuls granulated sugar mixed with a little cinnamon and bake in a quick oven to a light brown; as soon as done remove the cakes from the pans and lay them on a long platter, one over the other, with the sugared sides together; when cold serve with coffee.

826. Butter Cakes (with Baking Powder).— 2 cups sifted flour, 2 eggs, $1\frac{1}{2}$ teaspoonfuls baking powder, 1 tablespoonful melted butter, 1 cup milk, $\frac{1}{2}$ teaspoonful salt, the grated rind of 1 lemon and $\frac{1}{2}$ cup well washed currants; sift flour, salt and baking powder into a mixing bowl, make a hollow in center, put in the 2 whites and 1 yolk of eggs well beaten, add the lemon, the melted butter and mix it with the milk into a thick batter; lastly stir in the currants; spread the mixture into 2 well greased, shallow tin pans; first brush them over with the remaining yolk, then with 2 tablespoonfuls melted butter; mix 3 tablespoonfuls granulated sugar, 2 tablespoonfuls finely cut citron, $\frac{1}{2}$ cup finely chopped almonds together, sprinkle this over the 2 cakes and bake immediately in a quick oven till done and a light brown. Prepared flour may be substituted for baking powder.

827. Apple Cake.— Prepare a dough the same as for Butter Cakes and divide it into 6 parts, as the dough for Apple Cake has to be thinner than for Butter Cakes; line 6 shallow tin pans with the dough and set it to rise to double its height; in the meantime pare, core and cut into eighths some large, tart apples and lay them together closely in long rows over the cake; drop 1 tablespoonful melted butter over each cake, sprinkle over some granulated sugar and bake in a hot oven; when done dust with powdered sugar.

828. Cheese Cake.— Dissolve $\frac{1}{2}$ yeast cake in $\frac{1}{2}$ pint warm milk and add 1 pound sifted flour, 2 eggs, $\frac{1}{2}$ teaspoonful salt, 2 tablespoonfuls butter and $\frac{1}{2}$ tablespoonful sugar; work this into a soft dough and set it in a warm place to rise to double its height; then roll it out $\frac{1}{8}$ of an inch in thickness; butter 2 large cheese or pie plates, cover them with the dough, ornament the edge and let it rise again until light; mix 1 pound fresh pot cheese with $1\frac{1}{2}$ cups thick sweet or sour cream, $\frac{3}{4}$ cup sugar (or sweeten to taste), 3 eggs and $\frac{1}{2}$ cup currants; when this is well mixed together brush the dough over with melted butter and fill the plate with the cheese mixture; bake in a medium hot oven.

829. 832. Bread.— 2 quarts flour, 1 teaspoonful salt, 2 teaspoonfuls sugar, small tablespoonful lard or butter, 1½ pints lukewarm water, 1 of Fleischmann's yeast cakes. Break the yeast cake into a cup, add 1 teaspoonful sugar and sufficient lukewarm water to fill the cup, set it in a warm place till the yeast rises to the surface. Sift flour, sugar and salt into a bowl, add the lard or butter and rub it fine in the flour; then make a hollow in centre of flour, pour in the yeast and the remaining water, stir it with a spoon into a stiff dough, turn it on to a floured board and work it with the hands and some flour until it does not stick to the hands; return the dough to the bowl, cover and let it stand in a warm place to rise. When the dough has risen to double its size, butter 2 brick-shaped pans or use the crusty bread pans, dust them with flour, divide the dough into 2 equal parts, mould them into loaves on the board, put them into the buttered pans, cover and let stand till the dough is to top of pan, place it in medium hot oven and bake 1 hour. If the bread is to be mixed at night take only ½ yeast cake, otherwise proceed the same as above.

COFFEE.

833. How to Make Coffee.— Coffee should always be bought in the bean and ground when wanted. It should never be allowed to boil, as all the fine aroma is thereby lost. The finest, quickest and most economical way to make coffee is by making it in a bag made as follows:—Take a piece of coarse unbleached muslin, about ¾ yard long and ¾ yard wide, costing about 5 cents per yard; fold on the bias to a point, sew it together in such a way that the bag has the shape of a funnel and hem it on the top; then place the bag in the coffee pot; let the point hang so that it does not quite reach the bottom; let the top of bag lay over the outside of the coffee pot; then put in 1 cup freshly ground coffee, pour over ½ pint boiling water and let it stand 1 minute; then add 1 quart boiling water and let it stand about 3 minutes on side of stove; have ready the urn in which the coffee is to be served, which should be well rinsed with boiling water, pour in the coffee and serve at once; pour more boiling water over the coffee grounds and let it stand on side of stove for a short while; then serve the same way; the second coffee will be found nearly as good as the first. If the coffee is too strong add more water; if not strong enough add less water, as some like it strong and others do not. Another way is to take 3 heaping tablespoonfuls freshly ground coffee and 6 cups boiling water; grind the coffee as fine as possible; rinse out the coffee pot with boiling water, put in the coffee and pour on enough boiling water to cover it well; let it stand in a warm place for 5 minutes, but do not allow it to boil; then add the remaining boiling water, let it stand for a few minutes and either serve in the same coffee pot in which it was made or strain through a fine sieve into a hot silver or china coffee urn and serve at once. This is also an easy and economical way of making good coffee, but the first-named method is the best.

FRUIT SALADS.

834. Watermelon Salad.— Cut a watermelon in two, remove the seeds and break the red part into pieces with a silver fork; put it in layers in a glass dish, sprinkle each layer with sugar and place the dish on ice for 2 hours; when ready to serve pour over ½ pint claret. If objected to the wine may be omitted.

835. How to Serve Watermelon.— Cut a watermelon in half lengthwise; then cut each half first

248

in two and then into long pieces about 2 inches in thickness; arrange the pieces nicely on an oblong plate and serve. The melon should lay for several hours on ice before being cut, as it is not nice unless cold.

836. Plum and Peach Salad.— Choose 1 dozen large egg plums, cut them in two and remove the pits; pare and quarter ½ dozen large, ripe peaches and put them in layers alternately with the plums in a glass dish with 1 cup sugar sprinkled between; place the dish on ice for ½ hour before serving.

837. Orange and Coconut Salad.— Pare and cut some nice oranges into pieces and remove the seeds; put a layer of the oranges sprinkled with sugar into a glass dish, then a layer of freshly grated coconut and next a layer of apple or currant jelly; then oranges again; continue in this way until the dish is filled; place the dish on ice for 1 or 2 hours and serve. If not handy the jelly may be omitted.

838. Peach and Pear Salad.— Pare and cut into fine slices 4 large, ripe Bartlett pears; pare and cut into quarters ½ dozen large, ripe peaches; put them with the pears into a glass dish with a layer of whipped cream and sugar between and serve at once.

839. Peach Salad.— Pare and cut 1 dozen peaches into quarters, put them into a glass dish, sprinkle sugar between and over them and place the dish on ice for ½ hour before serving.

840. Banana Salad.— Cut the fruit into slices, put it into a glass dish with sugar sprinkled between, squeeze over some lemon juice and pour over 1 glass claret; place the dish on ice for 1 or 2 hours before serving.

841. Raspberry and Currant Salad.— Remove the stems from 1 pound currants and wash and drain them; also wash and drain 1 quart raspberries and put them into a glass dish with 1½ cups sugar; cover and let them stand for 3 or 4 hours before serving.

842. How to Serve Blackberries.— Put blackberries into a colander, let cold water run over them and set colander for a few minutes into a dishpan to drain; put the berries into a glass dish with powdered sugar. Huckleberries are prepared the same way.

249

843. Banana and Orange Salad.— Remove the skins from 4 bananas and cut the fruit into slices; pare and cut ½ dozen oranges into small pieces and remove the seeds; put oranges and bananas alternately into a glass dish with sugar sprinkled between, set them on ice for 1 hour and then serve.

844. Pineapple Salad.— Pare and quarter 1 ripe pineapple, remove the hard part in center and cut each quarter into fine slices or dice; pare and cut ½ dozen oranges into small slices and remove the pits; put oranges into a glass dish in alternate layers with pineapple with plenty of sugar sprinkled between and place them on ice for 1 or 2 hours before serving. Strawberries with pineapple are prepared the same way.

845. Cherry Salad.— Remove the pits from 1 pound cherries, sprinkle with sugar and let them stand for 1 hour; then put them with 1 pint ripe strawberries and a little more sugar into a glass dish, set them on ice for 10 minutes and serve.

SALADS.

846. Fine Mayonaise, No. 1.— The yolks of 4 eggs, 8 tablespoonfuls salad oil, 4 tablespoonfuls white vinegar, 1 teaspoonful salt, 2 teaspoonfuls sugar, from 1 to 2 tablespoonfuls French mustard and ½ pint whipped cream or 3 tablespoonfuls condensed milk which is not sweet; put the yolks in a small saucepan and stir them to a cream; then slowly add, stirring constantly, 4 tablespoonfuls oil; when this is well mixed add the 4 spoonfuls vinegar, set the saucepan in a vessel of boiling water and stir over the fire till contents of saucepan begin to thicken; then instantly remove and continue the stirring until cold; then slowly add the remaining 4 spoonfuls oil, stirring constantly; next add the salt and sugar; then the mustard and lastly the cream or condensed milk. This mayonaise is excellent if made exactly according to recipe. These quantities will make a mayonaise sufficient for 10 persons. If the mayonaise is not all wanted at one time fill it into jelly glasses without the cream. It will then keep for some time. The cream can be added when wanted for use.

250

847. Mayonaise, No. 2.— 2 eggs, 4 tablespoonfuls oil, 2 tablespoonfuls vinegar, 1 teaspoonful sugar, ½ teaspoonful salt, 2 tablespoonfuls French mustard and 4 tablespoonfuls whipped cream or 1 tablespoonful condensed milk which is not sweet; put the yolks into a small vessel and stir them to a cream; add by degrees the oil, stirring constantly; then slowly add the vinegar, set the vessel in a saucepan of boiling water and stir and boil till the contents of saucepan begin to thicken; then remove from fire and stir until cold; add the salt, mustard, sugar and vinegar; beat the whites to a stiff froth and slowly add them to the above mixture; stir in the cream or condensed milk just before the salad is to be dressed. These quantities will make a salad sufficient for 8 persons. If it is not to be all used at one time put it into a small glass or stone jar (without the cream or milk) and cover tightly to exclude the air. If kept in a cool place it will keep for some time. When wanted for use add the cream. This mayonaise is both cheap and excellent.

848. Plain Mayonaise.— Put some cracked ice into a dishpan and place a bowl in the center of the ice; put the yolks of 4 eggs into a bowl and stir them well with a wooden spoon for 5 minutes; then slowly add ½ bottle best olive oil; add only a few drops at a time and stir constantly; if too much oil is added at one time it will not mix together; if the sauce gets too thick add a little vinegar and lastly a few tablespoonfuls whipped cream, salt and vinegar to taste. Another way is to rub the yolks of 2 hard boiled eggs fine and mix them with 2 raw yolks; otherwise finish the

same as foregoing recipe.

251

849. Sauce Tartare.— Mix 1 pint mayonaise made as in preceding recipe with 1 tablespoonful French mustard and 1 teaspoonful English mustard mixed, 3 anchovies freed from skins and bones and pressed through a sieve, some finely chopped parsley, small, chopped onion, 4 tablespoonfuls chopped capers, some vinegar and pepper; this sauce is mostly served with cold meat.

850. Mayonaise without Eggs (economical).— 1 teaspoonful cornstarch, $\frac{1}{2}$ cup boiling water, 6 tablespoonfuls oil, 3 tablespoonfuls French mustard, 1 teaspoonful salt, 2 teaspoonfuls sugar, 4 tablespoonfuls vinegar and 1 tablespoonful condensed milk which is not sweet; mix the cornstarch with a little cold water, add the $\frac{1}{2}$ cup boiling water and stir and boil for a few minutes; then set aside to cool; put the mustard into a bowl and gradually add the oil, stirring constantly; next add the sugar, salt and vinegar; then the cornstarch and lastly the milk.

851. Salad Dressing without Oil, No. 1.— 2 ounces butter, 2 eggs, 2 tablespoonfuls vinegar, 1 teaspoonful sugar, $\frac{1}{2}$ teaspoonful salt and 2 tablespoonfuls French mustard; melt the butter in a cup by setting it into hot water for a few minutes and then set it aside to cool; stir the yolks in a small vessel with salt and sugar to a cream and add the melted butter, a little at a time, stirring constantly; next slowly add the vinegar, set the vessel in a saucepan of hot water and stir until the contents begin to thicken; then remove, stir until cold and slowly add the other ingredients; beat the whites to a stiff froth and mix them with the sauce; if handy add a few tablespoonfuls cream; if English mustard is used take 1 teaspoonful mixed with cold water.

852. Salad Dressing without Oil, No. 2.— 1 teaspoonful flour, $\frac{1}{2}$ cup boiling water, 1 tablespoonful butter, 2 tablespoonfuls vinegar, 1 teaspoonful sugar, $\frac{1}{2}$ teaspoonful salt and 2 tablespoonfuls French mustard; mix the flour with a little cold water, add the boiling water, boil 2 minutes and add the butter in small pieces; remove from fire and mix by degrees with the vinegar, then the mustard and the other ingredients; to this sauce the yolks of 2 eggs may be added and also the 2 whites beaten to a stiff froth; or the yolks of 2 hard boiled eggs rubbed through a sieve and the whites chopped fine and sprinkled over the salad.

252

853. How to Prepare Lettuce for Salad and for Garnishing.— Cut off the stalks from 3 or 4 heads of lettuce, pick off all the decayed and withered leaves, break the tender green leaves apart one by one and remove the thick veins; put the lettuce into cold water, rinse well and let it lay in ice water for $\frac{1}{2}$ hour or longer; shortly before serving drain the lettuce in a colander; then put it in a napkin, shake out well and use as directed.

854. Lettuce Salad (plain).— Prepare the lettuce as in foregoing recipe, lay it into a salad dish and pour over 2 or 3 tablespoonfuls salad oil and a little pepper and salt; add to $\frac{1}{2}$ cup white vinegar 4 tablespoonfuls water and pour it over the salad; mix it up well with 2 salad forks, sprinkle over a little cracked ice and serve at once. If ice is not handy the salad will have to be prepared without it, but it adds greatly to the crispness of the lettuce. If you rub a piece of garlic over the salad dish just before putting in the lettuce it will give the salad a fine flavor without really tasting of garlic. A small spoonful of sugar may be sprinkled over the lettuce if liked. Finely shaved onions may also be added.

855. Lettuce Salad with Mayonaise.— Prepare the salad as directed, put it into a salad dish and pour over a mayonaise dressing. Finely shaved onions may be added if liked.

856. Lettuce Salad with Sweet Egg Sauce.— Cut 2 ounces fat pork into very small dice and fry them a light brown; beat 2 or 3 eggs until very light and slowly add the pork, 3 or 4 tablespoonfuls vinegar and 2 tablespoonfuls sugar; mix this well together and pour it over the salad. This recipe will make a sufficient quantity to dress 3 heads of lettuce. More vinegar diluted with a little water may be added; also more or less sugar.

857. Lettuce Salad with Syrup Sauce (North German art).— Mix 1 tablespoonful flour in a small saucepan with a little cold water until all lumps are dissolved, add 1 cup boiling water and stir and boil for a few minutes; add 1 tablespoonful butter and continue boiling for a few minutes longer; then transfer it to a bowl and set aside; when nearly cold add $\frac{1}{2}$ cup syrup, a pinch of salt, 2 tablespoonfuls vinegar and 1 tablespoonful sugar; set this sauce on ice or in a cool place for 5 minutes before serving; put the prepared lettuce in a dish and pour the sauce over it; sufficient for 4 large heads of lettuce. Salad prepared in this way is served in North Germany with German pancakes instead of butter. Fat pork cut fine and fried to a crisp may be used.

253

858. Lettuce Salad with Cream Sauce (North German art).— Prepare the lettuce as directed for 3 or 4 large heads of salad; take 1 pint thick, sour cream and add 3 or 4 tablespoonfuls sugar, a pinch of salt and 1 or 2 tablespoonfuls vinegar; mix this together and pour over the salad; then serve at once.

859. Lettuce Salad with Cream.— Put the prepared lettuce in a dish and pour over some sweet cream to which a little sugar has been added. Some people add a little vinegar and a pinch of salt. Salad prepared with this sauce is often served with large German pancakes.

860. Beet Salad.— Wash and put $\frac{1}{2}$ dozen beets in a saucepan with boiling water and cover and boil them till tender; when done put the beets into cold water, remove the skins and cut them while still warm into thin slices; also cut 1 medium sized onion into thin slices; put the beets and onion in alternate layers into a dish and sprinkle between 1 teaspoonful salt, $\frac{1}{4}$ teaspoonful pepper and 2 teaspoonfuls sugar; pour over an equal quantity of vinegar and water (enough to nearly cover the beets) and let them stand 1 hour before serving. Omit the onion if its flavor is not liked.

861. Salad Macédoine.— Take equal quantities of boiled white beans, boiled potatoes, celery roots, beets and string beans (the last 4 boiled in salt water) and cut into fine slices; put into a bowl 2 or 3 tablespoonfuls oil, vinegar and salt, pepper and some sugar; put in all the ingredients, add some finely chopped parsley and chervil and mix the whole together thoroughly; put the salad into a dish and garnish with lettuce leaves. If the vinegar is too sharp dilute it with water.

254

862. Salad à la russe.— Boil 6 medium sized potatoes with the skins on, 2 beets and 3 celery roots; when cold remove the skins and cut them into small dice; also cut into dice 2 pickles and 1 dozen anchovies or 3 herrings previously soaked in water, freed from skins and bones and cut fine; add to this 2 tablespoonfuls capers, $\frac{1}{2}$ cup grated horseradish and mix the whole with a fine mayonaise; put the salad on ice for 1 hour before serving; when ready to serve put the salad onto a round dish, pile up high in center and garnish with hard boiled eggs; chop fine the yolks and whites separate; also chop beets and green pickles fine, lay them in small clusters all over the salad and garnish the edge with green lettuce leaves or shaved pink and white horseradish. Pink horseradish is made by pouring a little cochineal over it and mixing well.

863. Cucumber Salad.— Select 3 medium sized cucumbers with small seeds, pare and cut a small piece from each end and lay the cucumbers in strongly salted ice water for 1 hour or longer; 10 minutes before serving take them out of water, wipe dry and cut on a board with a sharp knife into fine slices; put them into a salad dish, sprinkle over a little salt and pepper, pour over 2 tablespoonfuls salad oil and mix it with the cucumbers; then pour over $\frac{1}{2}$ cup white vinegar to which a little water and a pinch of sugar has been added; if onions are liked cut a medium sized one into thin slices and put them between the cucumbers; some finely chopped parsley may also be added if the flavor is liked.

864. Salad de laitue romaine.— Take several heads of young, green lettuce; do not wash them; put them into a dish, add some coarsely cut chervil, tarragon and pimperl and dress it either with salt, pepper, oil and vinegar or with mayonaise.

865. Salad of Oyster Plant.— Scrape and wash 2 bunches oyster plant and drop as you clean it into cold water to which 1 cup vinegar and 1 tablespoonful flour have been added; put a saucepan over the fire with boiling water, add $\frac{1}{2}$ cup vinegar, $\frac{1}{2}$ tablespoonful flour wet with a little cold water, put in the oyster plant and boil till tender; when done drain in a colander and when cold cut it into lengths 2 inches long; arrange it nicely in a dish and pour a mayonaise over; or dress the oyster plant with oil, vinegar, pepper and salt.

255

866. Asparagus Salad.— Pare and cut into 2 inch lengths 1 bunch asparagus and boil it in salt water till tender; when done drain in a colander and when cold put the asparagus into a salad bowl; dress it either with mayonaise or pepper, salt, oil and vinegar.

867. Carrot Salad.— Scrape and wash $\frac{1}{2}$ dozen medium sized carrots, put them in a saucepan over the fire with boiling water, add 1 tablespoonful sugar and boil till tender; when done take them out of water and set aside to cool; shortly before serving cut the carrots into fine slices, put them into a salad dish and pour over a mayonaise dressing; or dress the carrots with pepper, salt, oil and vinegar. If very large carrots are used first cut them in quarters and then into slices or dice.

868. Carrot Salad with Asparagus.— Prepare $\frac{1}{2}$ dozen medium sized carrots the same as for Carrot Salad; when cold cut them into dice; boil the heads of 1 bunch asparagus in salt water till done, but not too soft; drain it in a colander and set with the carrots in the ice box for 1 hour; shortly before serving put the carrots and asparagus heads, in alternate layers, into a salad dish, pour over a mayonaise and garnish the dish with hard boiled eggs cut into slices and young lettuce leaves; sprinkle a few capers over the top.

869. Carrot Salad with Onions.— Prepare the carrots the same way as in foregoing recipe; cut 3 or 4 medium sized onions on a board with a sharp knife into slices as thin as wafers, put them in alternate layers with the carrots into a dish and pour over a mayonaise dressing; or dress with oil, vinegar, pepper and salt; add to vinegar a little water and sugar.

256

871. Celery Root Salad.— Boil $\frac{1}{2}$ dozen celery roots; when done take them out of water and when cold pare and cut into quarters; cut each quarter into thin slices, put them into a salad dish and season with salt and pepper; add 2 or 3 tablespoonfuls salad oil and $\frac{1}{2}$ cup vinegar; mix this well together and pour over $\frac{1}{2}$ cup boiling water; or dress the salad with mayonaise and garnish with green lettuce.

872. White Celery Salad.— Take the white part of 1 or 2 bunches of celery and lay it for 1 hour in ice water; shortly before serving cut the celery into small pieces $\frac{1}{2}$ inch in length, put it in a salad dish and pour over a mayonaise dressing; let it stand on ice for 15 minutes before serving. Some people use all of the celery except the leaves, but the salad is finer when made of the white part only.

873. If meat stock is not handy dissolve 2 teaspoonfuls Liebig's beef extract in 1 quart boiling water and use it instead of meat stock. Another way is to boil 4 calves' feet till they fall apart; then strain off the liquor, set it aside and when cold remove all the fat; boil the liquor down to 2 quarts; then beat the whites of 4 eggs to a froth and add the juice of 1 lemon and a little water; add to the broth sufficient white vinegar to give it a nice sour taste; also add a little salt, some whole pepper corns, a few blades mace, 4 cloves and 1 bay leaf; stir in the beaten whites, continue stirring, let the contents boil for a few minutes and let it stand 5 minutes; then draw to side of stove, let it stand 5 minutes and strain through a flannel jelly bag. 918. Garnishing.— The articles which are mostly used in garnishing are:—Lettuce, cresses and hard boiled eggs (either cut into slices or quarters or chopped fine, the yolks and whites separately, and laid alternately in small clusters all over the salad); or cut green pickles in slices and lay them in a circle around the salad with small clusters of finely chopped beets and chopped eggs; small girkins, capers, olives and very small, white pickled onions are also used for garnishing. Another way is to cut boiled carrots, white turnips and beets into fancy shapes, such as half moons, stars, leaves and roses, with a vegetable cutter; anchovies are also largely used in garnishing. They are freed from skins and bones and then rolled up and laid in a circle around the dish with small white onions, pink horseradish and olives or girkins.

919. Horseradish for Garnishing.— Remove the outside black skin from a large root of horseradish and wash it clean; then shave it off with a knife in long narrow strips so they curl up; color $\frac{1}{2}$ the shavings with prepared cochineal and leave the other $\frac{1}{2}$ white; then use for decorating dishes of meats or salads by laying it in small clusters around the dish.

920. Cocoanut for Garnishing Salads.— Grate cocoanut and sprinkle it over the top of salad. Especially nice over chicken, shrimp and fish salads; also on potato, tomato and egg salads. Grated cocoanut lends a handsome appearance to any salad.

ICES AND GLAZES.

921. How to Use Icing.— Over large cakes pour the icing by spoonfuls near center on top of cake and spread it with a broad-bladed knife dipped in cold water all over the cake as smoothly as possible; set it in a cool oven for a few minutes, then in a dry, airy place, free from dust, to dry. Some icing does not need to be put in the oven, as it dries immediately, as will be seen from the directions given in following recipes. Small cakes are dipped into the icing or into glaze and then laid on paper or tins to dry. If the cake is to be ornamented make a paper funnel as follows:— Take a piece of brown paper, not too thick, or white tea paper 12 inches square and cut it through on the bias in two pieces from one corner to the other; take one piece in your right hand, the bias side from you, roll with the left hand, the bias side towards you, and form the paper into a funnel; bend the end where it closes near the top over to the inside, clip a small piece from the end of funnel with a scissors and slip a small tube inside it to the end opening; then put in the icing and bend the top of funnel in all around the same way as $\frac{1}{4}$ pound tea is put up in those small funnel-shaped bags; next press the icing down towards the end and commence to squirt it onto the cake. The cake may be ornamented with a border and a harp in the center, or an anchor or any kind of a pattern that may be desired. Flowers and leaves may be bought at any confectionery and pasted on with a little icing.

270

922. White Icing.— Sift $\frac{1}{2}$ pound powdered sugar into a bowl, add the whites of 2 eggs and stir 20 minutes; add a few drops lemon juice while the stirring is going on; drop a little icing onto paper; if the icing stands without running it is stiff enough; if it shows the least tendency to run more sugar must be added. This icing is used for ornamenting cake and serves as a kind of paste to stick flowers and leaves onto top of cake.

923. Clear Icing.— Sift $\frac{1}{2}$ pound powdered sugar into a bowl, add the whites of 2 eggs and stir for 5 minutes; add a few drops lemon juice and stir 5 minutes longer; then spread it over the cake; set the cake for 2 or 3 minutes in a cool oven, take out and let it dry for a few hours in a dry place which is free from dust.

924. White Icing with Wine or Liquor.— Mix $\frac{1}{2}$ pound sifted powdered sugar with the white of 1 egg and add 3 tablespoonfuls maraschino, Madeira or sherry wine, kirsch, rum or brandy; before this icing is put on cover the cake with a layer of jelly; then put the icing over it and set the cake for 1 minute in the oven; then set it in a dry place which is free from dust to dry. To make pink icing add a few drops prepared cochineal or strawberry syrup. Yellow icing is made by adding prepared saffron. Essence of lemon or the grated rind of 1 orange may be used instead of vanilla flavoring.

271

925. Almond Icing.— Pound 3 ounces blanched almonds with the white of 1 egg in a wedgewood mortar to a paste, mix them with $\frac{1}{4}$ pound powdered sugar, the white of $\frac{1}{2}$ egg and $\frac{1}{2}$ teaspoonful vanilla extract and stir for 5 minutes; dip small pieces of cake into the icing; pour and spread it over whole cakes with a broad-bladed knife. Hazel nuts and walnuts may be used the same way as almonds, as can also pistachio nuts. To the latter add a few drops spinach green.

926. Fruit Icing.— Mix $\frac{1}{2}$ pound sifted powdered sugar with the white of 1 egg and add 3 tablespoonfuls fruit juice—either raspberry, strawberry, currant, pineapple or peach; if lemon or orange juice is used add a little grated rind; spread the icing over the cake and set it for a few minutes in a cool oven; then set it in a dry place which is free from dust to dry.

927. Sugar Glaze.— Mix 1 cup powdered sugar with 2 tablespoonfuls water and put it over the fire to get lukewarm; pour over the cake and let it dry, which will take but a few minutes; dip small pieces of cake into it. Glazes of raspberries, strawberries, pineapples, peaches, wine, maraschino or rum are made the same way. Omit the water and use 2 tablespoonfuls fruit juice or wine, whichever kind is wanted.

928. Maraschino Glaze.— Mix 1 cup sifted powdered sugar with 1 tablespoonful water and 1 tablespoonful maraschino, let it get warm on the fire and pour while warm over the cake. It will get hard in a few minutes. Rum glaze is made the same as Maraschino Glaze.

931. Coffee Glaze.— Mix 1 cup powdered sugar with 2 tablespoonfuls strong coffee, let it get lukewarm and use at once.

932. Wine Glaze.— Boil 1 cup sugar with $\frac{1}{2}$ cup water until it forms a thread between 2 fingers; remove it from fire, add 2 tablespoonfuls sherry or Madeira wine and stir for 1 or 2 minutes; then quickly pour it over the cake and let it stand in a dry place which is free from dust to harden.

933. Boiled Cinnamon Glaze.— Boil 1 cup sugar with $\frac{1}{2}$ cup water and 1 teaspoonful powdered cinnamon until it forms a thread between 2 fingers; remove it from fire, stir for a few minutes and use at once.

Cold Sugar Glaze.— Mix 1 cup sifted powdered sugar with 2 tablespoonfuls cold water and add 1 teaspoonful lemon or vanilla extract; spread glaze over the cake and set it for 1 or 2 minutes in a cool oven to obtain a glaze; then remove and set in a dry place which is free from dust to dry. NOTE.—Instead of water any kind of fruit juice syrup, wine, rum or Cognac may be used. If lemon juice is used take $\frac{1}{2}$ water, $\frac{1}{2}$ juice and a little grated rind. For orange use a little rum and 2 tablespoonfuls orange juice. For coffee use instead of water 2 spoonfuls strong coffee. For chocolate stir in 2 tablespoonfuls grated chocolate or cocoa the same way, or melt the chocolate in the oven and then add it to the sugar.

273

937. Boiled Chocolate Glaze.— Place a small saucepan with $\frac{1}{2}$ pound sugar, $\frac{1}{2}$ pound grated chocolate and $\frac{1}{2}$ pint water over the fire and stir and boil till it forms a thread between 2 fingers; remove from fire and stir until a thin skin forms on top of glaze; then use it at once; spread it evenly all over the cake and set for a few minutes in a cool oven. If the glaze should become too cold before it is all used return it to the fire and repeat again. The glaze when done should shine like a mirror.

938. Transparent Glaze.— Boil 1 cup sugar with $\frac{3}{4}$ cup water until it forms a thread between 2 fingers; remove it from fire, stir for a few minutes and then quickly use; dip small pieces of cake into the glaze, pour over large pieces and spread it apart; let it dry in an airy room which is free from dust.

939. Rose Glaze.— Boil 1 cup sugar with $\frac{1}{2}$ cup water till it forms a thread between 2 fingers; remove at once and add 2 tablespoonfuls rose water and a little prepared cochineal, to color it to a delicate pink; stir for a minute and then pour it over the cake. Small cakes may be dipped into the glaze and set in a dry place which is free from dust to dry.

940. Spinning Sugar.— Put $\frac{3}{4}$ pound loaf sugar in a small copper kettle, add sufficient cold water to half cover the sugar and stir until it is melted; then place the kettle over a strong fire and boil the sugar to a crack (the 6th grade); add a few drops vinegar, remove the kettle, dip it for a few minutes into cold water and let it cool off a little; if the sugar is spun when too hot the threads will be too thin and lumps will form; then place the kettle in a pan of hot water, or on the side of stove, to keep the sugar warm; take a large knife in the left hand and hold it out straight before you; take a silver spoon in the right hand, dip it into the sugar without touching the bottom of kettle and let some of the sugar run off from the spoon; then spin long threads back and forth over the knife from right to left; after a considerable amount of sugar is spun in this way take it from the knife, lay on clean paper and spin the rest in like manner; when all is spun form the sugar into pompoms, garlands, bouquets, etc. Half the sugar may be colored with cochineal to a delicate pink. The sugar should be spun in a place free from draughts and in clear and dry weather. This sugar is used for decorating and trimming dishes.

274

941. Boiling Sugar.— Put 1 pound sugar into a kettle with $\frac{1}{2}$ pint water and let it stand for a few minutes; then put it over the fire to boil; while the boiling is going on dip a small brush into cold water and wipe off the sides and edge of kettle; the different grades the sugar goes through

in boiling are as follows:—1st grade, broad run; 2d grade, small pearl; 3d grade, large pearl; 4th grade, the small blubber; 5th grade, the large blubber; 6th grade, to a crack; 7th grade, caramel; boil the sugar for a few minutes and dip the point of a spoon into it; if the sugar falls in large drops from the spoon it has reached the 1st grade; continue the boiling for a few minutes longer; dip your first finger into it and press the finger against the thumb; then open the fingers and if the sugar forms a thread between the 2 fingers it has reached the 2d grade; after boiling a little longer dip in a spoon and if a pearl hangs onto a long thread of the spoon the sugar has reached the 3d grade; after a few minutes longer boiling take a little in a spoon, blow it and if the sugar falls from the spoon in blubbers it has reached the 4th grade; after a few minutes longer take a little of the sugar between your fingers and quickly dip into cold water; if the sugar can be formed into a ball it has reached the 5th grade; after a few minutes longer dip the finger into the sugar and then quickly into cold water; if the sugar can be broken it has reached the 6th grade; then set the saucepan in cold water; if it boils a few minutes longer it will have reached the 7th grade, or caramel. The principal care in boiling sugar is to use the exact amount of water. With too little water the sugar will curdle before it has boiled enough. If too much water is used the sugar will have to boil too long and will turn yellow. It should boil quickly and only for a short time. It will then stay white.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. START: FULL LICENSE

THE FULL PROJECT GUTENBERG LICENSE

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg™ License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg™ electronic works

1.A. By reading or using any part of this Project Gutenberg™ electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg™ electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg™ electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg™ electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg™ electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg™ electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg™ electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg™ mission of promoting free access to electronic works by freely sharing Project Gutenberg™ works in compliance with the terms of this agreement for keeping the Project Gutenberg™ name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg™ License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg™ work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg™ works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg™ trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. - You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain "Defects," such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the "Right of Replacement or Refund" described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg™ work, (b) alteration, modification, or additions or deletions to any Project Gutenberg™ work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg™

Project Gutenberg™ is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg™'s goals and ensuring that the Project Gutenberg™ collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg™ and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 809 North 1500 West, Salt Lake City, UT 84116, (801) 596-1887. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate

Section 5. General Information About Project Gutenberg™ electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg™ concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg™ eBooks with only a loose network of volunteer support.

Project Gutenberg™ eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg™, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
