Internet Archive

*** START OF THE PROJECT GUTENBERG EBOOK HINTS ON BOBCAT TRAPPING ***

HINTS ON BOBCAT TRAPPING

OBCAT is the name by which the wild cats of the genus Lynx are known in most of the United States, particularly the warmer parts -West and Southwest. Though related to the mountain lion, or cougar, both being members of the same family, the bobcat is a much smaller animal and of somewhat different habits, so far as the selection of prey is concerned. Its larger cousin, the Canada lynx, is found in the northern, more forested, parts of the United States and in Canada. The economic relations of the two are similar, except as forest-dwelling habits are modified by the bobcat's environment of plains and deserts in the Southwest. The bobcat has keen eyesight and a good sense of smell, though the latter is not so acute as in the wolf or the coyote. Most of its hunting for food is done at night, and the animal is aided by sight rather than by scent. The advance of settlement and the occupation of the bobcat's former ranges for stock raising have not so much crowded back this predator as they have given it a new and satisfying provender, particularly in the young of the flocks and herds of the stockman and the poultry of the farmer. Control of its depredations at times becomes necessary to man's economic welfare.

RAPPING has been found to be one of the most effective methods of bobcat control. On its wild ranges the bobcat feeds to a large extent upon rabbits and other injurious rodents, but it preys also upon such valuable forms of wild life as antelope, deer, and other game animals, especially the fawns, and on wild turkeys, quail, and other ground-nesting birds. With human occupation of its former haunts, it finds in the young of domestic livestock very satisfactory substitutes for its ordinary fare in the wild. When its food is less easily obtained in nature than among the flocks and herds of the range country, it may become exceedingly destructive to domestic livestock, especially to sheep during the lambing season, to pigs, goats, and calves, and to poultry. The depredations of bobcats in parts of Arkansas in recent years have made hog raising on an extensive scale impracticable in such localities. Losses caused by this predatory animal among sheep are particularly severe when lambing is conducted on the open range and the lambing grounds are in close proximity to the broken, rough, rocky canyons that favor the presence of the bobcat. Sheepmen often choose such rugged country for lambing grounds because of the protection it affords against storms.

Nature of Depredations

On Gaining entry into a flock of sheep at lambing time, commonly under cover of darkness, the bobcat carries on its depredations in such manner as to cause little commotion there. The lamb is usually killed by a characteristic bite on the back of the neck or head, and then it is pulled down to be eaten. If its lust for killing is not satisfied, the bobcat may kill other lambs by the same method, continuing its work quietly until a large number have been destroyed. A single bobcat has been known to kill 38 lambs in this manner in one night.

Bobcats are easily caught in traps of the common double-spring steel type, in sizes 2 and 3. Such traps have been used by many generations of trappers, and although deemed inhumane by some persons, no better or more practical device has yet been invented to take their place. The brief description here presented of trapping methods to be used in bobcat control is based on field experiences of Federal and cooperative trappers who have applied methods developed by the Bureau of Biological Survey.

[Pg 2]

Where to Trap

In selecting a site for trap sets, one should be guided to a large extent by the tracks of the animal (fig. 1) and by other traces of its presence, which are commonly found in the rugged recesses of the open range. Such places as leached limestone ridges, limestone cap rock, or eroded granitic canyons containing an abundance of small caverns and holes surrounded by rather extensive underbrush form the ideal habitat of the bobcat. This may be in low-lying country or in adjacent higher mountainous areas. Though it is advisable to use the greatest caution in setting bobcat traps, the care with which the art is practiced need not be so great as in the case of the wolf or the coyote.

When the trail of a bobcat has been found, by track or sign, along, or leading from its rocky lair, traps may be placed in either double or single sets. If the trail is not frequently used by livestock also, or by such big-game animals as deer, the so-called "blind" trap set may be employed. This set is called a blind because no lure or scent need be used around it when completed.

Figure 1.—"Blind" or trail set being placed for bobcats. Trails used by both bobcats and cattle make ideal situations tor placing the blind set for predators during periods when stock is removed from such parts of the range

"Blind" Trap Sets

Whether single or double blind trap sets are employed, they should be placed in holes dug directly in the trail of the bobcat close to such an obstruction as an exposed root, a rock, or a clump of weeds, for the bobcat seldom fails to step over rather than on such an obstruction in its path. (Fig. 2.) If the double set is to be used, the trap holes should be only about 1 inch apart, separated just far enough to prevent interference of the jaws when the trap is sprung. Each hole should be dug only slightly larger than the size of the trap and just deep enough to hold the set trap and allow this to be slightly lower than the level of the surrounding ground. When two traps are used, they may be joined together with a lap link at the ends of their chains, which in turn may be attached to a stake pin driven slightly below the ground level; or a drag may be used either made of wrought iron or consisting of a fairly heavy stone. The drag should be bedded under the traps, in which case more excavating will be required. It is well to have a free-acting swivel at the top of the stake pin to prevent a captive animal from twisting and breaking the trap chains attached to it.

[Pg 3]

After the trap has been firmly bedded it is advisable to cover it with fine pulverized earth similar to that found in the mound of a pocket gopher. This will do for the spring of the trap. Dry and finely pulverized horse or cow manure may be more advantageously used to cover the inside of the trap jaws. Care should be taken to keep all loose dirt from getting under the pan and to see that there is an open space beneath it of at least a quarter of an inch.

A trap pad made of canvas or of old descented slicker cloth for finally covering the pan should now be placed on the inside of the jaws; then over all should be sprinkled dry dirt to the depth of a quarter to a half inch, of the same color as the ground surrounding the trap. The spot where the trap is buried should be left in as natural a condition as possible.

Figure 2.—Details of setting trap for bobcat in trail; trap bedded just beyond a natural obstruction in the path; the working parts of trap are lightly packed with cotton to insure springing when the ground is frozen

Scented Trap

A scent attractive to bobcats may be used to advantage to lure the animals to trap sets. When scenting is resorted to, however, the traps should not be placed in the runway

proper, but on either side of it, or on one side only, and parallel to Sets the trail. They should be set in the same manner as described for the blind sets, between the trail and the spot selected for scattering the scent. (Fig. 3.) This spot should be no more than 6 to 8 inches from the trap. In placing the scent, advantage should be taken of any stubble, bunch of weeds, exposed root, or object known as a scent post. These are so termed from the fact that they are the places selected by the animal for voiding urine or feces.

Bobcats usually have their scent posts slightly off the trail, on stubble of range grasses, on bushes, or even on old bleached-out carcasses. Where the ground conditions are right for good tracking, natural scent posts may be detected by the claw scratches and the small mound of dirt where the bobcat has covered its excrement. Such habits are similar to those of house cats. In passing along its trails, the bobcat will usually revisit these scent posts.

[Pg 4]

When natural scent posts can not be readily found, one may be easily established along the

determined trail of a bobcat by dropping scent (of a kind to be described) on a few clusters of weeds, spears of grass, or stubble of low brush. The trap should be set between the trail and the place scented, about 6 or 8 inches from each. (Fig. 4.) Any number of such scent stations may be placed along a determined trail. The farther from the trail a trap is set, however, the more scent will be needed. For dropping the scent, a 2 to 4 ounce bottle fitted with a shaker cork may be used

Figure 3.—Placing a scent set for bobcats: A, double trap set, placed as in blind sets, but a few inches off the trail instead of directly in it; B, traps bedded, and springs and jaws properly covered and pan unobstructed, ready for covering with a trap pad, on which the topsoil is to be spread. Scent sets are placed between the trail and a clump of weeds or other natural or artificial scent posts

Preparation of Scent

The basis of the scent may be any kind of fish, but oily varieties, such as sturgeon, eels, suckers, and carp, are preferred. The flesh should be ground in a sausage mill, placed in strong tin or galvanized-iron cans, and left in a warm place to decompose thoroughly. Each can must be provided with a small vent to allow the escape of gas, otherwise there is danger of explosion. The aperture, however, should be screened with a fold of cloth to prevent flies from depositing eggs, as the mixture seems to lose much of its scent quality when maggots develop in it. This preparation may be used within three days after mixing, but it is more lasting and penetrating when it is about a month old.

Fish scent alone gives excellent results, but several modifications have been found highly effective. To the decomposed fish as a basis may be added mice, beaver castors, musk glands from minks, weasels, and muskrats, and the bladders of coyotes and bobcats. Oil gives body to the scent and to a certain extent prevents freezing. If the mixture appears too thin, glycerin, brains, fish oil, butterfat, or other animal fat, such as that from woodchucks and ground squirrels, may be added.

The hunter may commence with a quantity of ground fish placed in a large galvanized-iron container, similar to a milk can, and as the original lot is used on the trap line, he may replenish it by adding more fresh fish and others of the ingredients mentioned. The addition of new material from time to time seems to improve the desirable qualities of the scent mixture.

Figure 4.—Details of placing scent set on cleared space between the trail and a clump of higher weeds or grass used as a scent post. Between the trap set and the scent post may be buried a jar having perforated top and containing cotton saturated with oil of catnip; or other scent material may be sprinkled on the clump of weeds to lure the bobcat to the trap

Catnip Oil as a Lure

OIL OF CATNIP, diluted in the proportion of 35 drops of the pure oil to 2 ounces of petrolatum, has proved an effective lure in bobcat trapping. As this is a fine oil, the petrolatum is used to give it body, and this tends also to prevent loss of the scent when exposed to rain. Pure catnip oil is manufactured at a few places in the United States, but if the pure oil is not obtainable, the leaves of the catnip plant may be boiled to a pulpy consistency in water, and this will produce a mild tincture of catnip which can be drawn off. Catnip in this form has been used as a lure by some trappers with a fair degree of success. A few drops of the mixture of petrolatum and pure catnip oil, or of the tincture, should be placed on the scent spot every third day.

Some Biological Survey hunters employ this lure by burying at one side of a bobcat runway a small glass jar or bottle (fig. 4) into which has been dropped gauze or cotton batting, saturated with catnip oil. The mouth of the

container is left open, but level with the ground, and is protected by a perforated top. If the top is bright, it should be made inconspicuous by moistening it, and while wet brushing it over with dust or sand. Trap sets placed, as described around such scent points have accounted for many bobcats.

[Pg 5]

Care in Details

Success in trapping, whether for bobcats or for other predators, is in many respects dependent upon the trapper's attention to what might seem to be minor details. While digging holes for the sets it is well for the trapper to stand or kneel on a "setting cloth," which is made of canvas or a piece of sheepskin or calf hide about 3 feet square. Human scent on the canvas may be avoided by previously burying the cloth in an old manure pile. The dirt removed from the place where the trap is bedded may be piled on the setting cloth. Surplus dirt not needed for covering the trap should be scattered evenly on the ground at some distance from the set. It is well also to wear gloves while setting traps, and to use them for no other purpose, though the precautions against arousing the suspicion of bobcats are less necessary than those in trapping wolves and coyotes.

[Pa 6]

Rust on traps.—Rust is often the cause of the failure of traps to spring properly, particularly when the trap pan rusts on its post. Most steel traps are so constructed that when the trap pan is moved back and forth it will spread the joint and thus permit the pan to work freely. Putting a few drops of fine oil on the post, as well as in the slots that hold the jaws at the base of the trap, will overcome such difficulties.

Frozen ground.—When the ground is frozen it is difficult to keep the traps in working order. Some hunters overcome this difficulty by lining the bottom of the hole in which the trap is to be bedded with clean coarse cotton or wool, and by packing more of this material around the pan, springs, and jaws after the trap is placed. When the ground is frozen, the dirt cover for the set can be made of such debris as is found on ant hills, or by using dead leaves or the fine earth obtained under spruce, fir, hemlock, or aspen trees.

Deodorizing traps.—When received from dealers or manufacturers, traps frequently smell of grease, perspiration from human hands, or other odors caused by contact with various kinds of merchandise in the course of shipment. As some of these odors are likely to arouse the suspicion of predators, it is advisable to clean all traps before using them. This may be done by boiling them in a tincture of sage leaves, or of leaves from other native trees. Common soil is a good deodorizer, but it acts slowly. Simply burying the traps for a few days in a manure pile (the odor from which does not arouse the predator's suspicion) will often remove all other odors. It is better, however, before using traps to clean them by boiling, as mentioned. Never attempt to burn off an odor over a fire, as this may destroy the temper of the springs and make the trap worthless.

Paper trap pads.—Paper pads are not dependable, as they are usually too smooth to hold the covering of soil. This is soon swept' off the paper when the trap is set in a windy place, and when this is gone the trap is exposed. Furthermore, rain will readily soak a paper pad, causing it to break or collapse and expose much of the set. Another objection to paper pads is that when an animal steps lightly into a trap jaw, resting its toes barely inside of it but not on the trap pan, it is likely to hear the rustle of the paper under its foot as well as to feel its smoothness. The result is that it will be shy of that particular spot, and thus a catch is lost. Trap pads made of fairly thick canvas or woven wire of fly-screen consistency are therefore preferable to paper pads. Such trap pads should be free from all odor, and when not in use should be kept in a clean container, such as the 1-pound cans used for ground coffee.

Resetting Traps

The trap may be reset after a bobcat has been caught, the same spot being used if the ground and the natural surroundings have not been too badly scratched up or otherwise defaced, and if evidences of disturbance can be cleared away. It may be highly desirable to reset the sprung trap in the same place, particularly if other good spots are lacking for scenting or for taking advantage of the natural obstructions needed for blind sets.

Transcriber Notes

As listed in the "CONTENTS", sidenotes in the original are used as section headers. Illustrations were moved so as not to split paragraphs.

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg $^{\text{TM}}$ electronic works to protect the PROJECT GUTENBERG $^{\text{TM}}$ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE THE FULL PROJECT GUTENBERG LICENSE PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg^{$^{\text{TM}}$} mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase "Project Gutenberg"), you agree to comply with all the terms of the Full Project Gutenberg^{$^{\text{TM}}$} License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg™ electronic works

- 1.A. By reading or using any part of this Project GutenbergTM electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project GutenbergTM electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project GutenbergTM electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.
- 1.B. "Project Gutenberg" is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg^{TM} electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg^{TM} electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg^{TM} electronic works. See paragraph 1.E below.
- 1.C. The Project Gutenberg Literary Archive Foundation ("the Foundation" or PGLAF), owns a compilation copyright in the collection of Project GutenbergTM electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project GutenbergTM mission of promoting free access to electronic works by freely sharing Project GutenbergTM works in compliance with the terms of this agreement for keeping the Project GutenbergTM name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project GutenbergTM License when you share it without charge with others.
- 1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg^{TM} work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.
- 1.E. Unless you have removed all references to Project Gutenberg:
- 1.E.1. The following sentence, with active links to, or other immediate access to, the full Project GutenbergTM License must appear prominently whenever any copy of a Project GutenbergTM work (any work on which the phrase "Project Gutenberg" appears, or with which the phrase "Project Gutenberg" is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may

copy it, give it away or re-use it under the terms of the Project Gutenberg License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

- 1.E.2. If an individual Project GutenbergTM electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase "Project Gutenberg" associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project GutenbergTM trademark as set forth in paragraphs 1.E.8 or 1.E.9.
- 1.E.3. If an individual Project GutenbergTM electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project GutenbergTM License for all works posted with the permission of the copyright holder found at the beginning of this work.
- 1.E.4. Do not unlink or detach or remove the full Project GutenbergTM License terms from this work, or any files containing a part of this work or any other work associated with Project GutenbergTM.
- 1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg $^{\text{\tiny TM}}$ License.
- 1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project GutenbergTM work in a format other than "Plain Vanilla ASCII" or other format used in the official version posted on the official Project GutenbergTM website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original "Plain Vanilla ASCII" or other form. Any alternate format must include the full Project GutenbergTM License as specified in paragraph 1.E.1.
- 1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg[™] works unless you comply with paragraph 1.E.8 or 1.E.9.
- 1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project GutenbergTM electronic works provided that:
- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg™ works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg™ trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by email) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg[™] works.
- 1.E.9. If you wish to charge a fee or distribute a Project Gutenberg[™] electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg[™] trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do

copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg $^{\text{\tiny TM}}$ collection. Despite these efforts, Project Gutenberg $^{\text{\tiny TM}}$ electronic works, and the medium on which they may be stored, may contain "Defects," such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

- 1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES Except for the "Right of Replacement or Refund" described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.
- 1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.
- 1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.
- 1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.
- 1.F.6. INDEMNITY You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project GutenbergTM electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project GutenbergTM electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project GutenbergTM work, (b) alteration, modification, or additions or deletions to any Project GutenbergTM work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg™

Project Gutenberg $^{\text{\tiny TM}}$ is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg $^{\text{TM}}$'s goals and ensuring that the Project Gutenberg $^{\text{TM}}$ collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg $^{\text{TM}}$ and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 809 North 1500 West, Salt Lake City, UT 84116, (801) 596-1887. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project GutenbergTM depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1\$ to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate

Section 5. General Information About Project Gutenberg $^{\text{\tiny TM}}$ electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg^m concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg^m eBooks with only a loose network of volunteer support.

Project GutenbergTM eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg $^{\text{TM}}$, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
